Solution Brief

AI Apps & Copilots Fast Start

Deploy an Azure OpenAI accelerator and develop an MVP plan that incorporates AI into your enterprise and leverages the Copilot stack.

Business challenge

Generative AI is transforming the way we work, enabling radical changes in how we find information, understand data and produce content. Its essential functions empower productivity enhancements across every role within an organization. But with so much potential, it can be difficult to know where to begin and how to build generative AI solutions specific to your apps, data and users.

How we help

Insight's custom Copilots Fast Start will give you a stronger understanding of Microsoft® Azure® OpenAI® and the Copilot stack to help you envision the benefits for your business. Insight will help you identify and prioritize high-value use cases, deploy an Azure OpenAI accelerator into your tenant, and envision and architect extensible copilot solutions for long-term success.

What to expect

During this Fast Start, we'll partner with you to strengthen your organization's approach to generative AI and custom copilot app integrations.

Align	Learn	Plan
• Understand the art of the possible with generative AI.	• Engage the productivity benefits of OpenAI within days.	• Research initial target app and technology stack.
• Ideate on use cases.	• Secure private install of Azure OpenAI in your tenant.	• Identify data sources, access and permissions.
• Prioritize the most important apps and use case(s).	• Configure 1 knowledge base for Cognitive Search and integrate into the accelerator, for easy testing with your own data.	• Develop an implementation plan for required copilot skills and connectors for your specific needs and objectives.
• Review key business requirements and desired outcomes.		

Duration

2–3 weeks

Cost

$50K

Benefits

+ Align business & IT stakeholders with a gen AI strategy.

+ Start learning by deploying an Azure OpenAI accelerator.

+ Plan your first custom Copilot implementation with supporting reference architecture.

+ Develop a roadmap of prioritized use cases to unlock value throughout your organization.

Example outputs

AI apps & use cases roadmap

Prioritize the most important apps and use cases based on ROI, key business requirements and desired outcomes as identified and agreed upon in the strategy workshop.

Deployed instance of Azure OpenAI with corresponding chat app

Leveraging our proprietary Insight Lens for Gen AI Accelerator, we will quickly deploy Azure OpenAI in your tenant and provide a web- and mobile-based chat interface to start learning and testing. We will also configure one knowledge base for Cognitive Search, so you can test interactions with your data.

Custom solution brief with copilot reference architecture

After researching the initial use case, target app, tech stack, data sources, access and permissions, we will design a custom copilot implementation architecture.

Why Insight for Microsoft?

Insight is in the top 1% of all Microsoft partners globally. Our 30+ year partnership and investment in transformation demonstrates our commitment to Microsoft technologies and maximizing their value for your business.

Microsoft Solutions Partner — Microsoft Cloud	**6** Solutions Partner designations	**18** Microsoft solution specializations
Largest global reseller measured in Microsoft revenue	**20,000+** supported agreements	**2,000+** dedicated Microsoft professionals
Gartner® 2021 MQ for Managed Workplace Services for the fifth consecutive year	Global footprint in **180 countries**	

Getting started is easy.
