

# Microsoft 365 Secure Score Assessment

Best practice management and protection of your devices, apps and users.

## Business challenge

Complex security environments leave many organisations unable to quickly identify, assess and mitigate security risks in the overall threat landscape. As businesses evolve, the expectations of IT and security teams continues to rise to an almost overwhelming level. Competing demand for skilled resources makes navigating a multitude of security recommendations an onerous task.

Running a Microsoft 365 Secure Score Assessment sets a pathway for organisations to align their security priorities with a best practice treatment recommendations and governance roadmap that provides a strategic understanding of user impact and business risk associated with each implementation activity.

## How we help

Insight's security specialists will guide you through a 2 week engagement to provide a detailed analysis of your current Microsoft 365 Secure Score and subsequently provide a roadmap to achieve your security objectives within Microsoft 365. During this engagement we will interview the relevant business stakeholders to understand strategic security requirements and align roadmap activities with business goals. The Microsoft 365 Secure Score Assessment includes reviews for the following products:

- Azure Active Directory
- Defender for Identity
- Defender for Office 365
- Exchange Online
- Microsoft Defender for Cloud Apps
- Microsoft Purview Information Protection
- Microsoft Teams

*Note: A separate offering is available for Defender for Endpoint*
