

Azure AD B2C Assessment

Business challenge

Azure® Active Directory® (AD) B2C helps businesses manage customer, consumer and citizen access to B2C applications with scalability and availability. But many businesses with consumer-facing applications are unfamiliar with Azure AD B2C and how to make the most of it.

How we help

This engagement helps lay the foundation and planning around Azure AD B2C migration, guiding you through preparing for and understanding the full scope of Azure AD B2C as an identity solution. Our team will give you the assets you need to plan, budget and coordinate with third parties for integration and federation.

How to prepare

To ensure you receive the greatest value from this evaluation, you'll need:

- A consumer-facing mobile and/or web application
- Access to architects and engineers that understand the solution and its architecture
- Understanding of the desired user experience from a consumer identity standpoint
- Willingness to explore cloud-based identity solutions

Duration

2 weeks

Benefits

- **Create a plan** for budgeting and coordination for a cloud-based identity solution.
- **Gain access to expertise** in solving consumer identity solutions challenges.
- **Receive architectural evaluation** as it relates to identity providers and authentication.
- **Develop a roadmap** for removing password storage from the application suite.
