

Databricks Fast Start

Business challenge

Data is the new currency of businesses — but its value can only be unlocked when you're empowered to transform that data into meaningful action. Built on Apache Spark™, Databricks helps you capitalize on your data and analytics with greater efficiency and flexibility.

How we help

From streaming analytics to big SQL or machine learning at scale, Insight will help you harness the power of Databricks to transform your data into actionable intelligence. Our award-winning team of engineers, architects and data scientists will demonstrate the value of Databricks using your data and use cases, and help you chart a roadmap to integrate modern tools into your data and analytics portfolio.

Preparing for transformation

To ensure you receive the greatest value from this engagement, you'll need:

- Business and technical stakeholders hungry to get more value from your data
- Possible streaming, big data or data science scenarios that could benefit from Databricks
- AWS® or Azure® cloud environment

Duration

2–4 weeks

Benefits

- Identify value cases for your organization.
- Demonstrate rapid prototyping using your data.
- Deploy one or more demos.
- Socialize value in a readout session.
- Build a roadmap of implementation.

Our approach

Ideation & envisioning	Rapid PoC	Visualization & readout
<p>We'll begin by exploring the power of Databricks and align its capabilities with your business opportunities. Together, we'll shape one to three cases for Proof of Concept (PoC) implementation.</p>	<p>Next, we'll roll up our sleeves and iteratively deliver on the cases envisioned on the first day of our engagement — and consistently refine our delivery and direction with your business, IT and leadership stakeholders. At the end, you'll receive code and artifacts, as well as one to three demo-ready Databricks solutions deployed.</p>	<p>On the final day, we'll drive executive and technical readouts to facilitate PoC understanding and knowledge transfer covering demos, implementation, value assessments and future opportunities. You'll be equipped to demonstrate value to your business, IT and leadership stakeholders — and identify next steps for your Databricks journey.</p>

About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
