Azure Cloud Enablement Accelerator

Fast track your path to the cloud

Business challenge

Today, IT teams must drive innovation while simultaneously managing day-to-day operations. To succeed, your business must transition into a cloud operations and governance organization.

By understanding and adopting governance frameworks, cloud automation tools and cost optimization strategies — and properly rationalizing applications for cloud deployment — your IT teams will be better positioned to support digital transformation initiatives and meet business demands.

How we help

Our Azure Cloud Enablement Accelerator will fast track your transformation journey. You'll have the opportunity to leverage our team of cloud experts to design and execute a comprehensive Azure® cloud strategy.

We'll begin with an initial discovery to define required outcomes, success criteria and digital estate planning. Next, we'll work with you to create a framework for enterprise cloud adoption, thoughtfully designed around governance and operations, security, apps and infrastructure. Upon completion of this engagement, your IT teams will be equipped to effectively operate and support Azure — and the various workloads your organization plans to deploy.

Preparing for transformation

To ensure you receive the greatest value from this engagement, you'll need:

- Azure subscription(s)
- Identified use cases with commitment to move to Azure
- Executive sponsorship

Duration
Approximately 6 - 12 weeks

Benefits
- **Defined** cloud operations & governance framework
- **Advanced knowledge** of cloud for IT teams
- **Improved agility** to support digital transformation

Get started.
