

Bite Size Transformation with Power platform

Business challenge

Large scale digital transformation can be difficult. Replacing ERP, CRM and HCM systems is both costly and risky and often fails to deliver all the intended benefits. Even when completed successfully, business departments and teams are left to fulfill gaps and white spaces in the end to end business processes with manual workarounds.

This is often achieved by copy critical business data in and out of various systems, emailing information between colleagues, teams and departments and using off-system approvals to drive business processes to completion.

Each of these manual processes represents a risk to your business, and a potential opportunity to increase your operational efficiency. Developing a strategy, framework and methodology to systemise these manual processes is where Bite Size Transformation with Power Platform can help. Use Power Platform to surround your key enterprise systems, and build lightweight, extensible and user centric automations to streamline your operations and safeguard your business critical data.

How we help

Insight's solution to lengthy development processes is Microsoft Power Platform's Bitesize Transformation methodology. With Insight's help, we can guide your business to create automations in hours and days rather than weeks, months, or years. By following Insight's simple 3-steps:

1. Insight's strategy team will guide your business through an ideation exercise and pinpoint and prioritise issues before defining user journeys and unlocking opportunities for automation.
2. Through human-centered design, the Insight UX and UI team will help you sketch your future state capturing key data and interactions points for each of your intended users.
3. Finally, using Microsoft's copilot AI-enabled capabilities we will generate app interfaces, business logic and workflows leveraging natural language to turbo-charge your automation journey.

The combination of Insight's Bite Size Transformation methodology and Microsoft's No & Low Code Power Platform helps businesses create efficient, effective, and secure automations that foster growth and improve employee experience and customer loyalty.

Duration: On request

Benefits

- Increase Operational efficiency
- Streamline manual process with no-code RPA and RDA
- Prioritise automations that deliver the largest ROI
- Surround your existing platforms to deliver lower TCO
- Fill the white space in your enterprise with connected, IT approved enterprise grade no & low code solutions.

Ideate to find the Problem

Don't replicate the current problem in a new technology. Understand the pain-points, define the business journey and identify the users to unlock the automation opportunities.

Draw the UX

You've defined the process, selected the technology - now engage the people to create a human centered design to deliver the benefits.

Create with Microsoft Co-pilot

Jump start your automation with Microsoft's AI powered co-pilot capabilities. Generate your app interface from a draw, add your logic with NLP and define your workflows with OpenAI.

Why Insight for Microsoft?

Few can compare with our relationship with Microsoft. Partners for 30 years and counting, we are the largest Microsoft global partner with more than 5,000 consultants and 1000 dedicated Microsoft resources globally. Our best-in-class capabilities, unmatched expertise, and ability to successfully deliver solutions built across all areas of Microsoft technology have earned us numerous recognitions.
