

Solution Brief

Insight's Microsoft 365 Copilot Readiness Assessment.

Prepare your business to realise the productivity promise and accelerate the time to value of Microsoft 365 Copilot solutions.

In today's dynamic yet competitive business environment, organisations are looking at how best to take advantage of the power of AI to improve the way they do business. The promises of improved productivity, efficiency and creativity must be balanced with mitigating the risks of AI.

Introducing AI within any organisation requires careful planning, preparation and readiness to deliver the gains promised without increasing associated security and governance risks.

You need to understand the:

Art of the Possible	Requirements	Plan	Adoption
Unlock specific use cases where AI and Microsoft 365 Copilot can provide business value.	Data, security and organisational foundations required for Microsoft 365 Copilot success.	Migration approaches, mitigate risks and steps to deploy.	Recommended steps to ensure optimal Copilot and generative AI adoption.

Insight can help you turn the promise into reality.

Insight's Microsoft experts will help you accelerate your time-to-value by helping your organisation mitigate the risks, build a comprehensive plan to deploy and adopt Microsoft M365 Copilot.

Our partner Microsoft

Workshop outcomes

- Readiness transformation service.
- Use case scenario and ROI planning.
- Adoption and continual change management.

Insight's Microsoft 365 Copilot Readiness Assessment

Insight will perform the following tasks to ensure your Copilot readiness:

		
Business Value Assessment	Technical Readiness Assessment	Change Readiness and Adoption Roadmap
<ul style="list-style-type: none"> Define what a Copilot and AI powered organisation looks like in your business. Identify and prioritise high-value Copilot use cases based on ROI, key business requirements and desired outcomes. 	<ul style="list-style-type: none"> Ensure technical prerequisites for Microsoft 365 Copilot are understood with detailed plans to meet the requirements. Evaluate your current Microsoft 365 estate with a licensing review and tenant adoption report. Map data across your estate to assess data sharing, permission creep and internal/external access. 	<ul style="list-style-type: none"> Business workflow ideation sessions to ensure your business is setup for success with the frameworks and knowledge to get started with Copilot from day zero.

Key deliverables

You will receive an actionable report that contains:

- Recommendations on most impactful features your organisation can enable within your current licensing structure to utilise Copilot safely and effectively.
- Guidance on next steps to prepare your organisation for Copilot, including migration approaches for non-cloud data and a license review.
- Recommendations on next steps and frameworks to establish a Copilot Centre of Excellence (CoE) to prepare and drive adoption.

Terms, conditions and pricing are custom to each engagement.
