

## Insights Power App's Quick Start

### Business challenge

With Microsoft Power Apps you'll be able to build the business apps you need and extend or customize the apps you already use, and Insight will help you get started on the right foot. Our experience with Microsoft PowerApps will help you build apps fast with a point-and-click approach to app design. As your partner we will begin the journey you can use to help your employees drive adoption and make the best use of Microsoft PowerApps within your organization.

### How we can assist

Insight will provide the basic setup and configuration of PowerApps and PowerApps desktop client for a specific number of users. Insight will work with the customer to identify a sample application for demonstration and then work with the customer to build a new sample PowerApp to be shared with other users.

During this Quick Start engagement, we will:

- Verify access to PowerApps
- Review functionality of PowerApps & sample Apps
- Create & publish a sample App
- Share an App across people and devices

### Preparing for assistance

To ensure you receive the greatest value from this engagement, you'll need:

- Business and technical stakeholders looking to extend functional capabilities
- The appropriate access to the PowerApp platform

### Duration

4–8 hrs.

### Benefits

- Explore a framework to increase business process efficiency
- Identify opportunity to increase ROI
- Start the journey to reduce development costs
