

RADIUS AI

Planning for AI impact? Start here.

Although many organizations plan to adopt AI solutions, most are struggling to align on a vision and establish a plan of action. They're unclear about which use cases would deliver the most value, what tech stack or model would be the best fit, or how they will measure the return on their investment. Insight has the answers: an easy-to-follow methodology for navigating your path to value.

Real world & industry relevant

Insight empowers RADIUS™ engagements with a rich set of industry examples and our own compelling AI success stories. These proven wins, which have driven efficiency, cut costs, and unlocked new revenue, become your starting points and guide you to the most impactful opportunities.

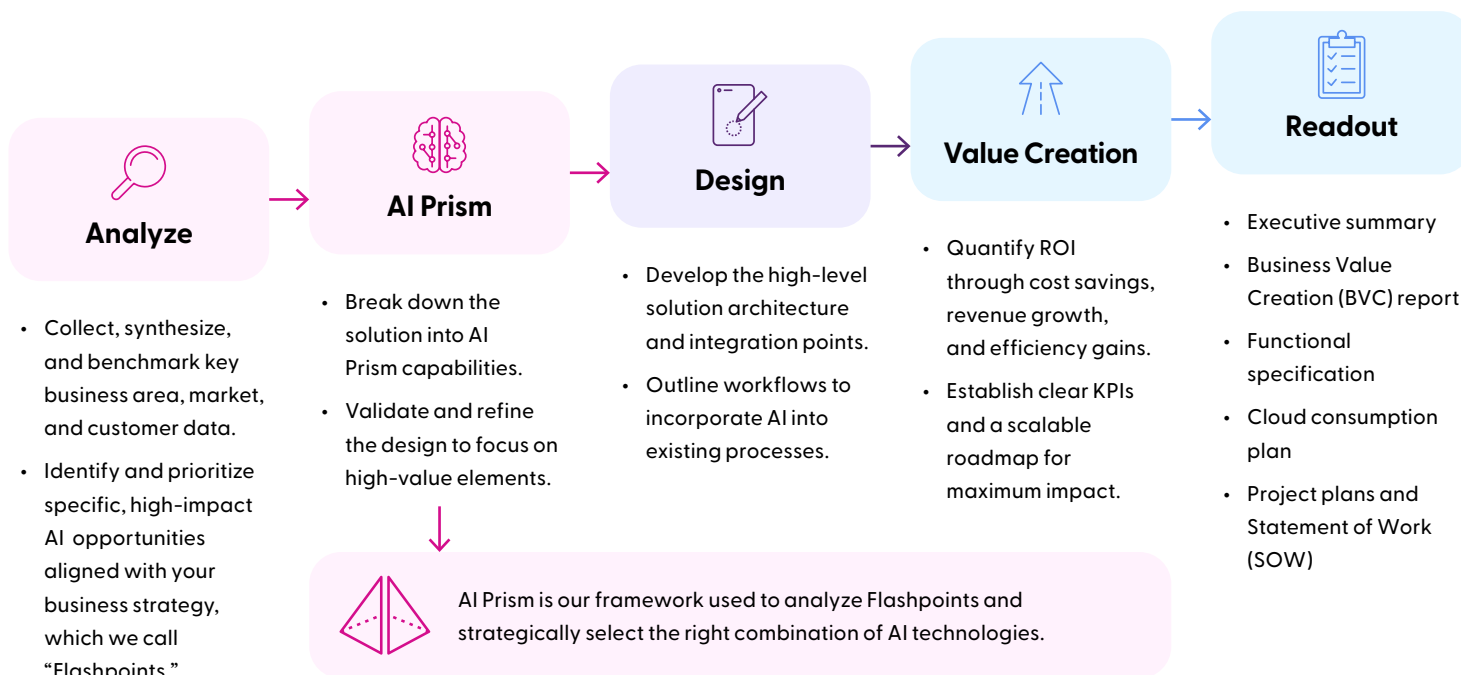

What to expect

RADIUS AI is a short, rapid-time-to-value engagement designed to align your business goals with practical AI solutions. We use proven methods and real-world examples to help you identify the best AI opportunities within your organization. Our architect-led process leverages AI tools to accelerate discovery and deliver clear, actionable plans. You'll leave with a defined scope, timeline, and budget, ready to start building and deploying effective AI solutions.

RADIUS AI

is a good fit for organizations that want to:

- Develop an AI strategy.
- Identify AI use cases.
- Build an agent or gen AI solution.
- Build and train a custom model.
- Leverage AI Foundry or Copilot Studio for AI solutions.
- Deploy and drive adoption of M365 Copilot.

RADIUS AI

Tangible takeaways

1. Executive summary

A brief, high-impact overview of key opportunities and risks, with clear, actionable recommendations for stakeholders

2. BVC report

Quantifies ROI with clear financial and operational metrics. Highlights value drivers and growth opportunities.

3. Functional specification

A technical blueprint detailing architecture, integrations, data flows, and performance requirements aligned to your business needs

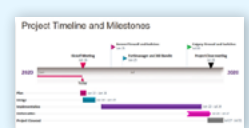

4. Cloud consumption plan

Details the workloads and estimated monthly cost

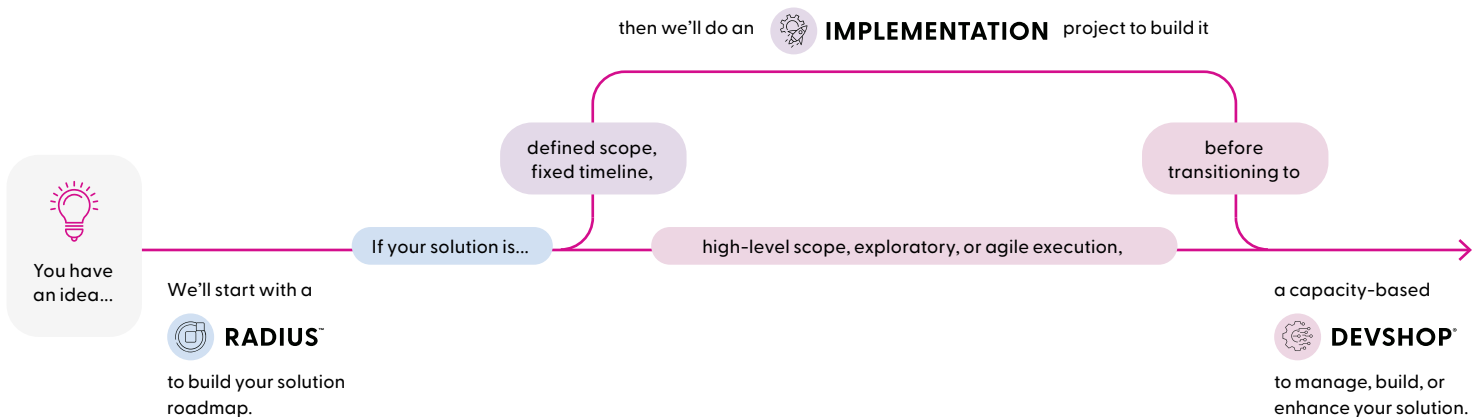

5. Project plans & SOW

A delivery roadmap – whether project-based or capacity-driven – defining scope, objectives, timelines, roles, and responsibilities

Maintain momentum.

Depending on the scope defined during **RADIUS™**, we'll proceed with either a fixed-fee implementation project or a capacity-based **DEVSHOP®** to build your solution. Both approaches are cost-optimized and focus on accelerating construction by leveraging both human and agent developers.

Why Insight?

Insight Enterprises is a leading Solutions Integrator that helps clients solve technology challenges by combining the right hardware, software, and services. As a Fortune 500 technology company, backed by 35+ years of expertise and a deep network of 6,000+ partners, we deliver secure, end-to-end IT solutions for organizations around the world.
