DESCRIPTION

70% of ERP projects worldwide end up a failure. Companies end up increasing the budget, replacing the implementor, replacing the actual ERP, and in some cases giving up and going backwards. Then there are the cases when the company itself is not ready for the change, whether it is lack of training, awareness, readiness or clear requirements.

In addition, while implementation partners do this for a living, you as the customer go through this experience once. It is why we offer this service of an experienced 3rd party expert in this area, providing you our knowledge and experience to reach your intended goal of being one of the successful 30%.

Our offering includes the following:

In Scope:

- 10 Days split over the entire project
- Review the proposed project plan and responsibilities
- Attend the kick-off meeting
- Conduct periodic reviews on the status of the project at the executive level
- Conduct a review all delivered documentation such as FRD, TDD, Sign-Offs, etc.

Benefits of this service:

- Ensure the created project plan and promised deliverables are accurate
- Ensure the implementation partner remains on-time / on-budget
- Ensure the project is running smooth
- Work as your external arm to resolve any disputes that might arise
- Raise any red flags that we might see as an external observer
