

Azure Sentinel Enablement Program

Summary

The Azure Sentinel Enablement engagement is an accelerated program that utilizes Azure Sentinel and supporting Microsoft services. Not only will clients receive guidance on Azure Sentinel, but they will also gain insights into active threats on-premises and in their cloud workloads.

What's Included

- Deployment of Azure Sentinel and supporting services
- Deployment of the following data connectors
 - Azure Active Directory
 - Azure AD Identity Protection
 - Office 365
 - Azure Activities
 - Security Events Collector
- A single playbook to provide an incident alert notification via email or Teams
- Azure Sentinel deployment road-map and threat overview

What's Required

- Clients looking to enable Sentinel in an accelerated manner will require the following
- Existing Azure tenant

Benefits

- Collect and analyze data at cloud scale
- Detect threats and minimize false positives using analytics and threat intelligence from Microsoft
- Hunt suspicious activities at scale
- Respond to incidents and integrate alerts with cloud orchestration and automation

Additional Options

If there is not currently an active Azure Subscription, an Azure On-Boarding / Scaffolding engagement will be made available to clients as a bolt-on to this engagement.

Azure Sentinel Enablement Program Details:

Our highly experienced team can deploy this solution which includes the following:

Insight PMO-managed solutioning including planning, scheduling, milestone management, and project closure.

- 1 DAY**
Solution Architect-run design sessions for Sentinel Deployment Planning
