

Solution Brief

Data Security Engagement

Identify data security risks in your organization data.

Partner-led engagement highlights

Understand the risk of dark organization data.

Learn about the risks organizational insiders may pose.

Assess your environment against key protection standards.

Get an analysis report on findings and associated risks.

Learn about tools and services to mitigate risks.

Explore recommendations and next steps.

83% of organizations experience more than one data breach in their lifetime.¹

Cybersecurity is a constantly shifting landscape. As our digital world continues to grow, so do the risks. According to research, 20% of data breaches are due to internal actors with an average cost of \$15.4 million when a malicious insider is involved.¹ Data leaks and theft might have been overshadowed by external threats in the past. However, they've become common vulnerabilities organizations need to address. Data security incidents can happen anytime anywhere.¹

Intelligently investigate and take action on data security risks.

Detecting, investigating, and acting on data security risks in your organization are critical. Doing so ensures trust, creates a safe workplace, and protects company assets and employee and customer privacy.

The Data Security Engagement gives you insights to understand data security, privacy, and compliance risks in your organization. As your business-critical data expands and your workforce shifts to remote work, an integrated approach to help quickly identify, triage, and act on data security risks is as important as ever.

During this engagement, our experts will work with you to:

- Document your objectives and strategy around data security, privacy, and compliance.
- Show you how to detect, investigate, and take action on data security and privacy risks.
- Demonstrate how to accelerate your compliance journey with the latest Microsoft® solutions.
- Provide actionable next steps based on your needs and objectives.

Cost

\$10,000—\$15,000

Duration

5 weeks

Benefits

- + Receive a security check report with findings from the automated discovery process.
- + Mitigate identified risks and enhance your compliance strategy with actionable recommendations and next steps.
- + Develop an understanding of Microsoft's approach to data security and insider risk mitigation.
- + Leverage the optional Microsoft Compliance Manager tenant-assessment report.

What to expect:

By the end of this engagement, Microsoft compliance experts will provide you with:

- + **Security check report** that includes findings from the automated discovery process
- + **List of recommendations** and actionable next steps to help mitigate identified risks
- + **Clear look** into Microsoft's approach to data security and mitigating and controlling insider risks
- + **Optional Microsoft Compliance Manager** tenant-assessment report with suggestions
- + **Long-term recommendations** on your compliance strategy, with key initiatives and next steps

Data security check

The data security check is an integral part of the engagement, uncovering risks that might be harmful to your organization. It is structured around typical Microsoft 365® services and their associated data repositories that organizations use. Optional modules can be added to cover on-premises data repositories, Microsoft® Windows® 10/11 endpoints, and more.

This engagement leverages Microsoft Purview® tools and services in an automated process to:

- Discover data stored in the Microsoft 365 cloud and analyze it for the presence of artifacts that may pose data security risks.
- Scan data repositories related to email, collaboration, and document storage.
- Analyze user behavior for events that pose a risk, ranging from the loss of intellectual property to workplace harassment.
- Help you develop a roadmap to mitigate and protect your organization's information.

Driving innovation with digital transformation

At Insight, we help clients enable innovation with an approach that spans people, processes, and technologies. We believe the best path to digital transformation is integrative, responsive, and proactively aligned to industry demands. Our client-focused approach delivers best-fit solutions across a scope of services, including the modern workplace, modern applications, modern infrastructures, the intelligent edge, cybersecurity, and data and AI.
