

Summary

Microsoft HoloLens 2™ harnesses the power of spatial computing in a revolutionary wireless headset that transforms how work gets done. Combined with the capabilities of Microsoft mixed reality applications, Insight can help your organization leverage the unique opportunities available through HoloLens 2 to help employees work more efficiently, cost-effectively, and safely. This workshop will introduce the HoloLens 2 device, immersive collaboration, and spatial use-case evaluation.

What's Included

- HoloLens 2 product overview
- Demonstration of built-in apps, and Dynamics 365 mixed reality apps including Remote Assist and Guides
- Discussion of custom application scenarios for HoloLens 2
- Use-case assessment to understand how HoloLens 2 can benefit your business

Benefits

From procurement through deployment, Insight offers end-to-end expertise and support to help you integrate spatial computing in your workplace:

• Hardware

Insight is the exclusive reseller of HoloLens 2 for North America.

• Custom development

We can help you build cutting-edge holographic content and move previous HoloLens applications to the next generation.

• Microsoft mixed reality apps

Deploying, adopting, and managing the technology of HoloLens 2 can be complex and costly. Insight's Digital Innovation team has the people, processes, workshops, and experience to create and streamline the integration of HoloLens 2.
