Teams FastStart

Summary
Teams FastStart is a Teams Enablement and Pilot that will enable your users to start collaborating and communicating using Microsoft's Teams platform.

What's Included
- Workshops to understand Teams needs, governance, adoption and change management
- Creation of up to five (5) starter Teams (including an Organizational Wide - Getting to Know Teams team for your users)
- A 1-page user-facing quick-start guide
- Teams enabled and deployed to twenty-five (25) Pilot Users
- Recommended enterprise roll-out and communications strategies

Benefits
- Users can work efficiently from anywhere with the following capabilities:
    - Audio/Video Conferencing
    - Screen Sharing
    - Instant Messaging
    - Real-time Document Collaboration
    - Context Rich Meetings
- Ability to use Teams Web or Teams Mobile applications in addition to the Windows and Mac desktop applications
- Providing users with a platform that tightly integrates with the existing Office 365 products and Azure AD security framework

Price:
Our highly experienced team can deploy this solution for as low as $7,500 and in as little as 1 week, including the following features:

- 5 Team Sites
- 25 Pilot Users

Option for broad rollout, IT-facing phone support, and voice integrations may be discussed
