

Teams Meeting and Meeting Room

Summary

Today, organizations rely on teamwork with employees working on twice as many teams as they did just five years ago. By extension information workers are spending 50% more time collaborating with co-workers, outside of their communication with contractors, suppliers, and customers.

The way we work has rapidly evolved and meeting needs have changed in response to the hybrid workforce, where many employees are working from home and while others work at the office. Video conferencing is vital for enabling a unified work environment, regardless of where your office is, and Teams Rooms helps to bring this all together.

What's Included

Insight Subject Matter Experts will provide:

- Discovery of existing meetings culture and current (or planned) meeting rooms and their devices
- Business and Technical requirements gathering and Art of the Possible workshops
- Identification of a Pilot Meeting Room(s) and the Use Cases
- Deployment of Teams Meeting Room(s) physical components
- Configuration of Teams Rooms, based on your requirements
- Future recommendations and adoption roadmap

Benefits

Some of the many Microsoft Teams Rooms capabilities include:

- Booking a conference room by adding a room to their Teams meeting invitation
- Single Touch to Touchless join experiences on Microsoft Teams devices for shared spaces
- Wireless Casting to the Teams Rooms with any device
- Seamless integration...with the communication and collaboration tools you already use every day
- Real-Time online whiteboard experience
- Consistent, familiar Teams experience that your staff is used to
