

Solution Brief

# Discover Sensitive Data Workshop

Discover risks from dark data and learn how to address them

## Overview

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation and contains information that could impose a compliance risk.

## Address compliance risks head on

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used, and compliance risks that may exist.

Discover Sensitive Data Workshop gives you the insights you need to better discover, protect, and govern your corporate data.

## Our solution

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to mitigating and controlling privacy and regulatory risks is more important than ever.

By attending this workshop, our experts will work with you to:

- Document your compliance objectives and strategy including compliant Teams' deployment and use.
- Show how to understand, mitigate, and protect against potential privacy and regulatory risks from dark data.
- Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies.
- Provide actionable next steps based on your needs and objectives.

# 60%

**of respondents report that half or more of their organisations's data is dark.**

## What to expect

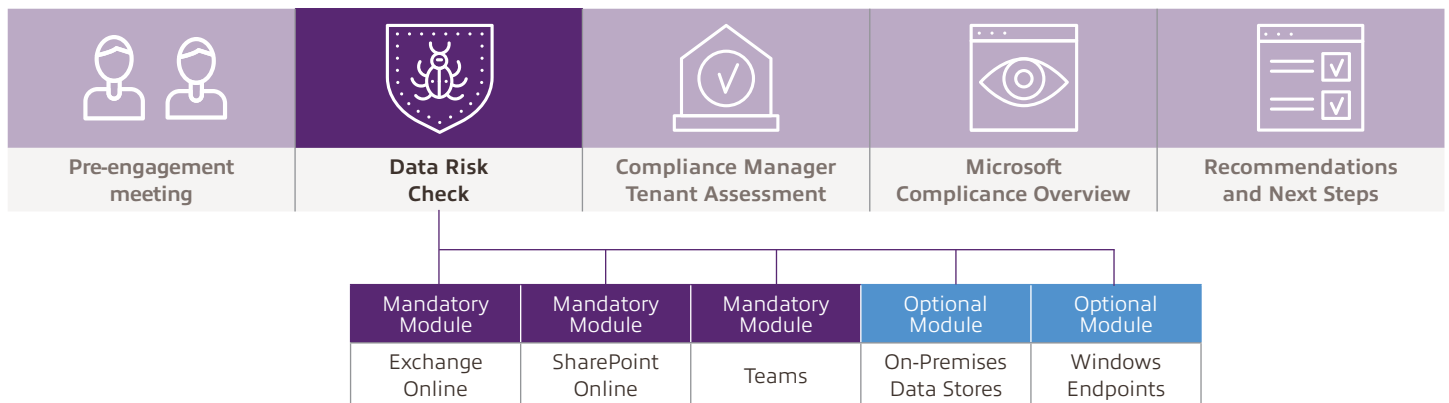

### Data Risk Check uncovers data that can cause a compliance risk

The Data Risk Check is the core activity of the Discover Sensitive Data workshop. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and surface privacy and regulatory risks in organizational data. Data Risk Check leverages automated Microsoft 365 tools and services to discover data stored in the Microsoft Cloud and identify potential problem areas.

The automated discovery process will analyse your existing data for:

- Sensitive information and intellectual property
- Unused or “stale” data
- Risky or suspicious activities

The Data Risk Check in its core will identify privacy and regulatory risks in Exchange Online, SharePoint Online, OneDrive for Business and Teams and can be extended with optional modules to scan on-premises data repositories and Windows Endpoints.

## Business outcomes

By the end of this workshop, experts in Microsoft compliance will provide you with a:

- Data Risk Check report that includes findings and insights from the automated discovery process
- A list of recommendations and actionable next steps that will help mitigate the identified privacy and regulatory risks

- Clear look into Microsoft’s approach to mitigating and controlling privacy and regulatory risks
- Compliance Manager Tenant Assessment report with suggestions and top key improvement actions
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps

## Why Insight?

Today, technology isn’t just supporting the business; it’s becoming the business. At Insight, we help you navigate complex challenges to develop new solutions and processes. We will help you manage today’s priorities and prepare for tomorrow’s needs.
