Turn Microsoft Excel Into Your SAP Data Management Command Center With Process Runner

Loading data into and extracting it from SAP can be a time-consuming and error-prone process. Your teams devote hours to entering, correcting, and managing data uploads. Meanwhile, business users across your enterprise need to make business decisions as changes in the market come and go. As someone responsible for data management in your organization, you can't afford to stall enterprise projects while waiting on an overwhelmed IT team to help.

Streamline and speed up SAP data management with Process Runner from insightsoftware. With immediate time savings and financial benefits, your enterprise can save up to 90% on your SAP data processing times. **Empower your internal teams and change your business with SAP data automation from Process Runner.**

Simple, Powerful Data Management

Give data management power to your business users. Using Microsoft Excel, they can manage and automate SAP data without coding, advanced training, or waiting for a Legacy System Migration Workbench from IT. Increase speed to market with faster data migrations, easier data transformations, and streamlined data management.

Data Conversion in a Snap

Quickly convert, cleanse, monitor, and migrate your SAP data. Load test data during process simulations or training preparation. Get last-minute data fixes during critical data conversion rehearsals and cutovers.

Migration With Re-engineering

Machine technology firm PRÜFTECHNIK planned a migration to SAP S/4HANA with hopes of automating its processes and re-engineering its master data. By using Process Runner, the firm quickly migrated 300,000 master data records and re-engineered 40 SAP processes.

“Process Runner is the best solution for migration with re-engineering to S/4HANA.”

- Dr. H.J. Schwieger, IT, PRÜFTECHNIK

Over 1,900 Quick-activation Templates

Accelerate your processes by running any of the more than 1,900 no-code automation templates right from your desktop. Each ready-to-run template from the cloud library includes an Excel file and automation script fully recorded and mapped. Process faster so you can take on other projects.

Time-saving Templates

Growing wholesale distribution company PACE Inc. struggled to manually load and update data in their SAP. Teams leveraged Excel familiarity and ready-to-run templates in Process Runner.

“We had payback on the tool in six months. For example, we processed 845 sales orders at one time uploaded with Process Runner, saving 45 hours of work. We’ve been able to take on more projects. And users love it!”

– Holly Brierer, PACE Inc.

Easy Data Validation

Take advantage of an additional layer of data governance beyond standard SAP security controls. From Process Runner’s control panel, easily monitor user access across the enterprise by setting data validation rules to prevent erroneous uploads to SAP. Save significant time by debugging data issues before loading your data into SAP.

Faster Time to Load by Debugging Data

Furniture manufacturer Kimball Office was trying to manage massive SAP data loads under tight time constraints. Kimball used the validation feature in Process Runner to debug data issues before loading the data into SAP, saving significant time.

“[insightsoftware’s] support is great. Turnaround time is also very good, but it’s the thorough solutions offered by your team that stand out.”

– Don Neu, Kimball Office

Automation for Any SAP Module Transaction

Automate common business processes and SAP T codes.

MANUFACTURING

- › Create and manage material requirements (MM01, MM02)
- › Create and change production schedules (CO01, KKF2)
- › Create and approve customer independent requirements (MD81, MD82)

LOGISTICS

- › Create and manage material requirements (MM01, MM02)
- › Create and download bill of materials (CS01)
- › Create warehouse master record (LS01)
- › Download material document list (MB51)

SALES & DISTRIBUTION

- › Create, change, and manage sales orders (VA01, VA02)
- › Create or change condition records (VK11, VK12)
- › Create or change billing document (VF01, VF02)

FINANCE

- › Post a general ledger document (FB01)
- › Download cost line items for cost center reports (KSB1)
- › Create bank master data (FI01)
- › Post a vendor invoice document (FB60)

MASTER DATA

- › Download MRP details (MD04)
- › Create or change master data (CC01)
- › Create a master recipe (C201)
- › Create customer master data (XD01)

HUMAN RESOURCES

- › Create personnel action form and other administration (PA40, PA30)
- › Perform HR data maintenance (PP06)
- › Download payroll list and maintain timesheet data (PA61)

Enterprise-wide Benefits

Process Runner doesn't require any back-end SAP configurations, costly setup fees, or complex integrations. Because it's easy to implement, your entire enterprise can realize its benefits in no time.

- **Increased productivity** with ready-to-run templates, eliminating tedious, error-prone manual data management.
- **Enterprise-wide impact** by enabling efficient data management and migration across all transactions for SAP modules.
- **Easy-to-use solution** so Excel users can confidently speed through everyday SAP data management tasks.
- **Accelerated time to value**, increasing speed to market with faster data migrations, easier data transformations, and streamlined data management.
- **Cloud controls** that centralize compliance and data governance to prevent risk and accidental damage to your SAP data investment.
- **Secure and compliant tool** that leverages and preserves all built-in SAP system security and governance protocols to provide scalable application integrity for growing businesses.
- **On-demand scheduling** with advanced frameworks to enable automation and flexible scheduling of process execution.

Connect Users Across Your Business

Optimize SAP data automation with these collaboration features.

Build Powerful Workflows

Users can quickly build and deploy enterprise data management workflows for collaboration, routing, and approvals to ensure conformance with enterprise governance.

Promote Team Collaboration

Team members can store, publish, share, and collaborate on business process files, presentations, and best practices within Process Runner, facilitating productivity.

Discover how Process Runner can automate your SAP transactions and data from Excel.
