actify education

INSPARI

Put data into system
and set it free

Actify Education is all your study administration data in one platform.

- Access always-updated data

- Make decisions on a strong foundation

- Find the needle in the haystack

INSPARI

Introduction to Actify Education

One platform, a truth

Information is gathered in one place, and is based on a common language and definitions around calculations. It is via the platform that you enter and find your automatically updated data instead of extracting it via manual Excel sheets.

A subscription solution

The subscription model creates transparency about your expenses and thereby economic stability and security.

Built in the Cloud

The solution lives in the cloud, which is why you do not have to invest in servers yourself or through your IT community. In the cloud you pay for consumption (pay as you go). In addition, there are built-in tools in the cloud that can make further development / connection to other / own data sources easier. In terms of safety, it meets all requirements.

The support of the solution

To ensure the quality and stability of the solution, support is part of the solution. Inspari Support's most important task is to monitor solutions 24/7 and be ready with a helping hand, should you have any challenges.
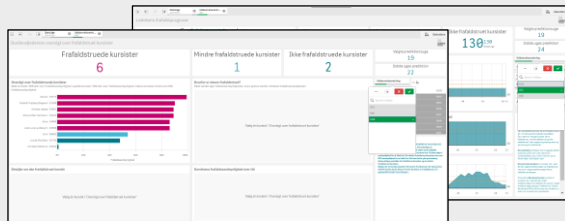

A part of something bigger

The possibilities with Actify Education are many. In addition to building on top of the solution yourself and expanding with new areas, you can benchmark against other schools (provided they are also on the solution) to raise quality and learning.

INSPARI

# Actify Education is a collection of user-friendly solutions

Dropout forecast

- Who is at risk of dropping out? + 90% accuracy within the next 3 months.

- Follow dropouts close on a monthly basis and compare with previous school years and across fields of study.
