INSPARK

Business App in 5 days

Experience the potential return on investment (ROI)

by deploying Microsoft Power Platform

We Are InSpark

We help organizations **accelerating** their **digital transformation** with impactful Microsoft solutions & expertise

INSPARK

Microsoft expects 500 million new business apps to be built in the next 5 years, which is more than all the apps built in the last 40 years.

INSPARK

On adopting Microsoft Power Platform

The business landscape is changing. Employees seek purpose and satisfaction. Employers aim to harness worker ingenuity. And a diverse, multi-generational workforce can now work anytime, anywhere. Success depends on your ability to collaborate and drive productivity within teams spread across the globe.

The Microsoft Power Platform is there to meet these evolving business needs. It is a suite of powerful tools that optimize productivity in today's corporate landscape. Whether that is to accelerate a simple business task or to transform your business model. And whether you decide IT facilitates the business or empower employees to be citizen developers.

We understand that adopting new technology involves change, and change can be daunting. Even for the most innovative, cutting-edge organizations. That's why we created our 'Smart Business App in 5 days' engagement. It is an easy-to-follow, hands-on experience that walks you and your team, step-by-step, through the best way to build an app with the Microsoft Power Platform. As a result, you'll have a fully functional app as well as a better understanding of the benefits, costs, and risks associated with a roll-out of Microsoft Power Platform within your organization.

Smart Business Apps

INSPARK

What are Smart Business Apps?

Solutions that support secondary processes in your organisation. Smart business apps automate time-consuming task and free-up your time. They make sure that processes are processed:

Consistently

Efficiently

With effortless user-interaction

With Smart Business Apps you can focus on what matters most for your organisation, the core business.

INSPARK

What are the benefits of Smart Business Apps?

- Quick time-to-market (say 5 days)
- Relatively easy to deploy
- Customizable to the desired process
- Relatively low development costs
- High return on investment (ROI)

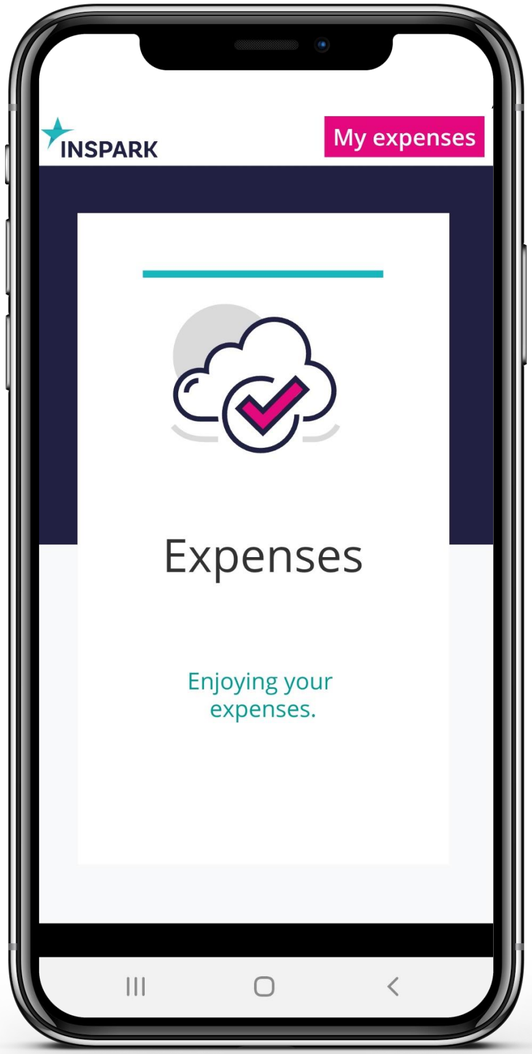
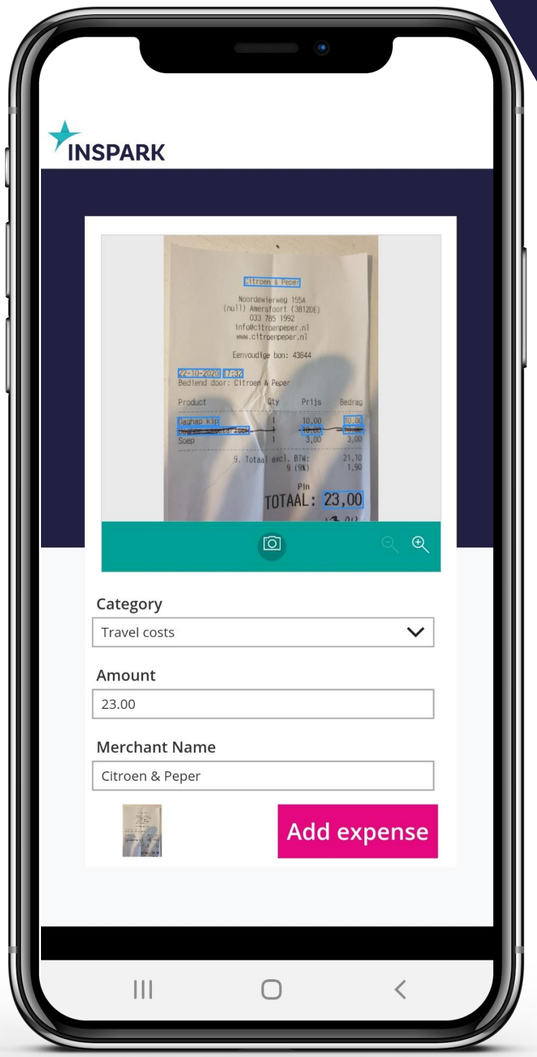
Smart Business Apps Examples

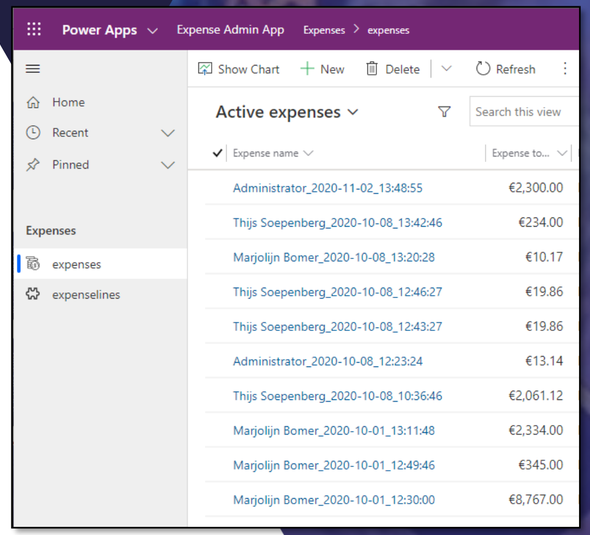
INSPARK

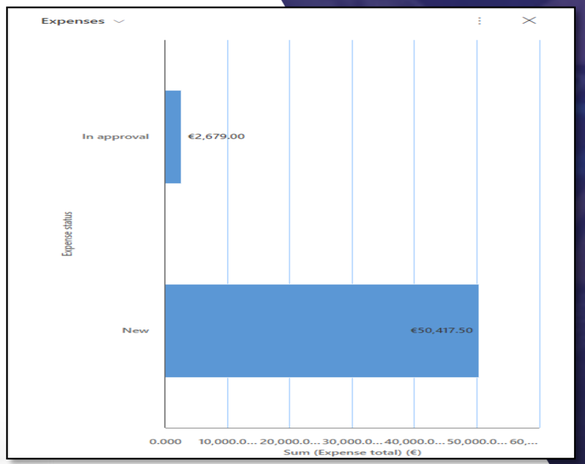
Power Apps, Power Automate, AI builder

Expenses app









Background / Business case

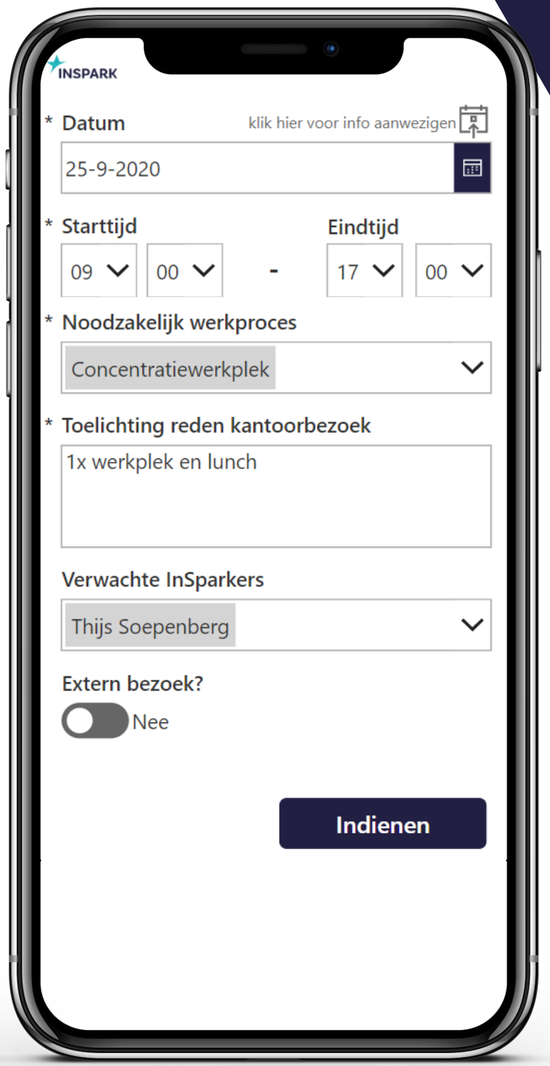
An expense claim process is relevant in almost every organization. We often see that organizations resort to third party solutions where it is not certain that all data will remain within the organization. The Expenses app closes the gap between functionality and data control.

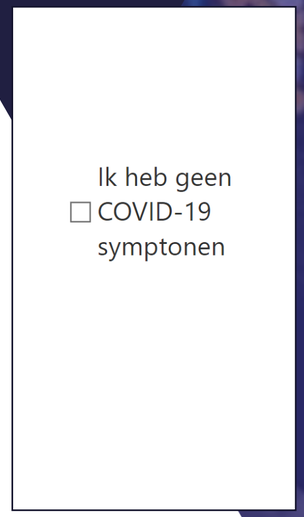
Functionality

- *You can add new expenses quickly via the mobile Power App.*
- *Scanning receipts with AI recognition, automatic filling of the amount.*
- *Assessment of claims by management team members.*
- *Always up-to-date insight into all declarations and status.*

Power Apps & Power Automate

Office planner





Background / Business case

Nowadays, organizations have adopted legislation for office visits and implemented a booking system to reserve a workplace at the office.

Functionality

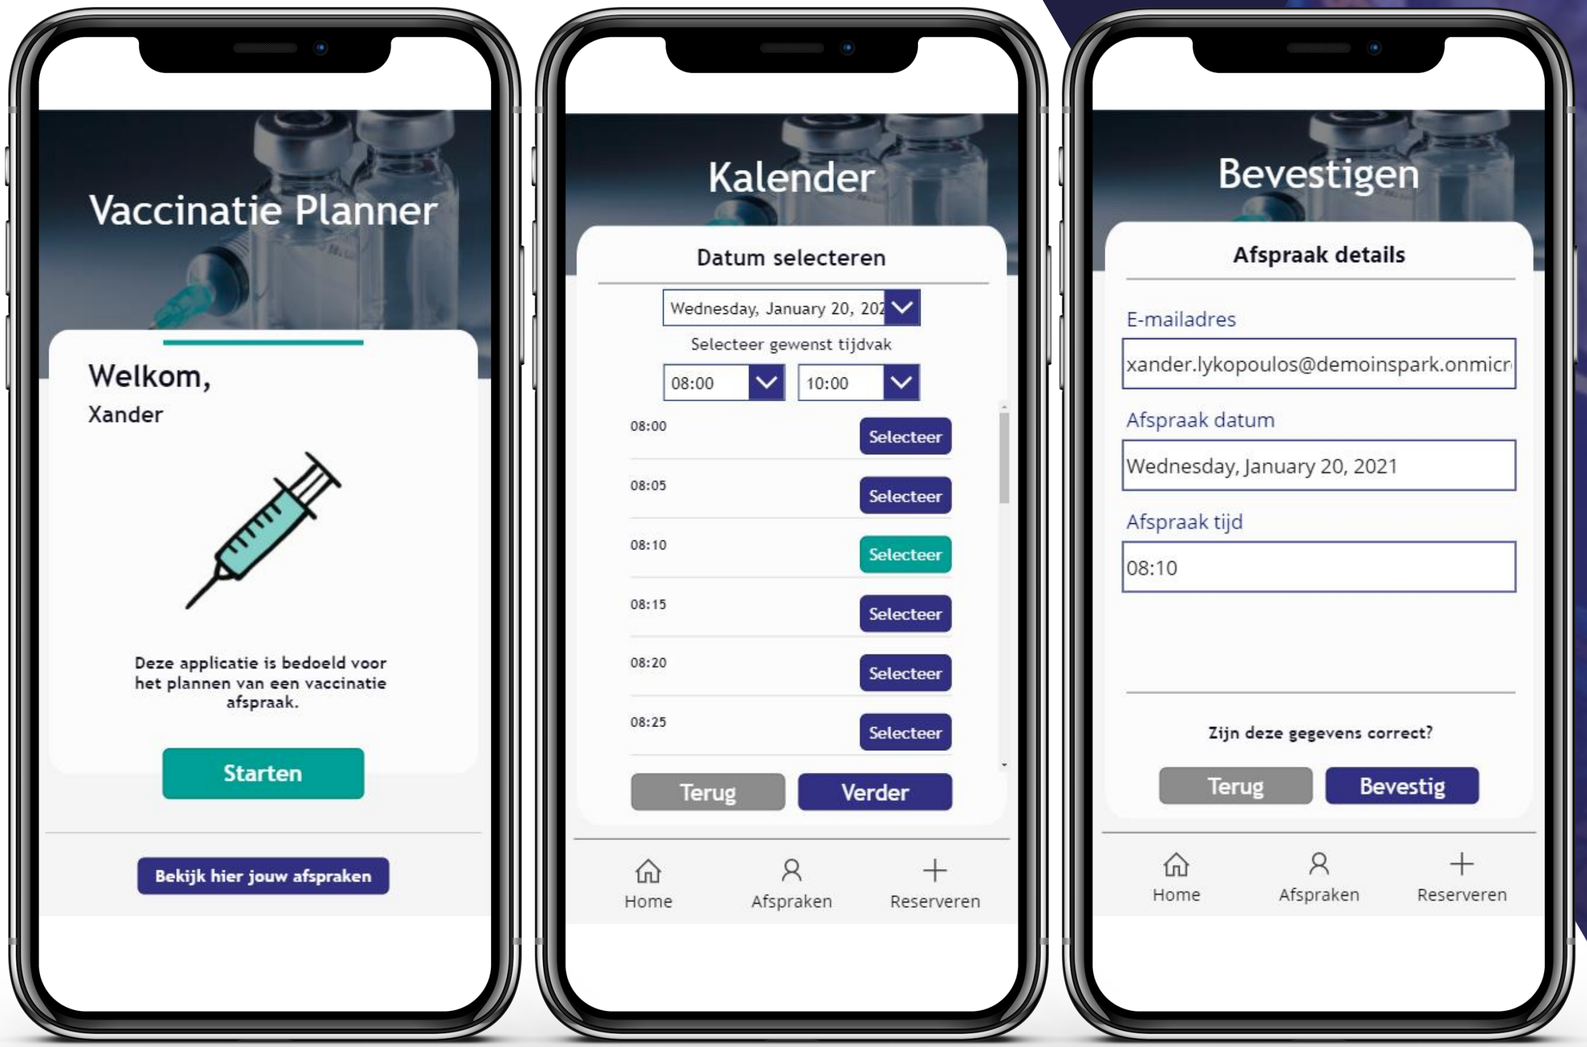
- *With this app it is possible to reserve a workplace at the office and to reserve a meeting room via a mobile device.*
- *New reservations are assessed by the secretary office or facilities, after which a confirmation (with applicable conditions) is shared with the applicant by email or Teams chat.*

MS Teams Ready App

Power Apps & Power Automate

Vaccine Planner

INSPARK



Background / Business case

Prior to, but especially since Covid-19 it is necessary for healthcare institutions and hospitals to provide employees with a flu shot and additionally with a COVID-19 vaccine. With the vaccine planner vaccination appointments can be booked via a mobile application.

Functionality

- *You can efficiently plan the appointment with this planner app.*
- *Reservation of a time slot per employee.*
- *Changing the time of a booking.*
- *Confirmation by email or Microsoft Teams chat*

MS Teams Ready App

Our Engagement Approach

INSPARK

Experience the potential ROI by deploying Microsoft Power Platform

By means of our ‘Business app in 5-days’ engagement you can experience how low-code/no-code development, workflow, and business intelligence tools can streamline your operations, reduce development costs and reliance on corporate IT, and improve business outcomes.

The InSpark ‘Business app in 5-days’ engagement guides the entire app building process and will provide you insights on how:

- Projects completed using low-code/no-code tools cost less.
- You can replace third-party and legacy business applications with Power Platform solutions.
- Power Platform delivers improved business outcomes across many dimensions.
- Power Platform helps maximize the value achieved with other Microsoft solutions as most of the Power Platform capabilities are included in Microsoft 365 and Dynamics 365 licenses.

What we deliver during the 5-day engagement:

- A time boxed engagement in which we choose, design and deliver a simple, loveable and complete (SLC) app for an actual use case in your organization.
- A proven approach with continuous support and knowledge transfer to your team throughout the engagement.
- InSpark best practices, building blocks and expertise from years of app building experience across multiple industries.

Business app in 5 days

Day 1	Day 2	Day 3	Day 4	Day 5

Vision and take-off	Design, plan, build and test	Improve and iterate	Touchdown
• Decide on the use case. • Familiarize the team with the objectives. • Determine roles and planning.	• Determine the technology components to use. • Design the data model. • Decide on the data source to use. • Create a Product Breakdown Structure. • Deliver the Product Backlog. • Test the app and collect feedback.	• Process feedback. • Do small fixes and improvements.	• Present the result to stakeholders and users.
