

Intapp Conflicts - confidently clear and manage conflicts

Reviewing new business for conflicts of interest is a significant challenge for law firms. The volume of new business to intake is often high, and the review process itself is laborious and time-consuming, whether you're using an outdated software system or manual workflow. With no clearly defined workflows and information spread across disparate systems, the data collection and review can be incomplete, leading to delays and putting the firm at risk of inadvertently taking on clients with whom they have a conflict of interest.

To address these challenges, law firms need to adopt a more centralized and automated approach to reviewing potential conflicts of interest. Intapp Conflicts helps firms identify and manage risk quickly, empowering them to confidently take on new business and implement a process that is efficient, accurate, and compliant.

How it works

Easily review and respond to conflict results

Key features

- **AI-assisted clearance:** Leverage machine learning and your firm's data to reduce the amount of conflicts the compliance analysts need to review.
- **Third-party data integrations:** Ensure accurate, up-to-date information and monitor changes in information, such as corporate tree data, sanctions lists, and other organizational updates.
- **Centralized quick search:** Optimize the conflicts search process with the ability to run a single search across all systems of record.
- **Interactive conflicts report:** Streamline reporting with the ability to templating and customize interactive conflict reports.
- **Team conflicts:** Review team member assignments to ensure the people you want to assign to a new matter do not have a conflict of interest with other work.

How Intapp Conflicts empowers your firm

Reduces manual compliance and review of data

Accelerates conflicts review

Increases speed to new client/matter acceptance

Ensures alignment to firm policy

Mitigates reputational and financial risk

Informs ethical walls policy
