# INTELLIGENCE MODULE

Connectivity Module:
You have the capability to generate Reports and Alerts related to the SP, CP, and the Operator. This means you can use this module to track and monitor a wide range of activities and events. These reports can serve different purposes, including financial, technical, and performance assessments, among others.In addition, you have the official report module bundled for free.

Marketing Module:
You have the capability to track all the interactions between the ad network and the advertiser, including conversions with user data, as well as their associated costs and sales reports, providing insights into the performance of each campaign.

By Default:
You have 10 ready Reports,
10 ready Alerts,
Live Reports,
Share inside/outside the organization,
All widgets
