

PROJECT ELEVATE

Turn Microsoft 365 Copilot into **Everyday Productivity**

Every organization is investing in AI.
But very few are seeing real change.

“Project Elevate helps organizations bridge that gap through a structured adoption journey focused on people, practical use cases, and lasting behavior change.”

Ask Yourself

- ▶ Do employees have access to Copilot but are still unsure how to use it effectively?
- ▶ Does leadership support the idea but lack a clear plan to roll it out?
- ▶ Are teams experimenting on their own, with no consistent approach?
- ▶ Was training completed, but day to day usage still remains low?
- ▶ Do you want measurable business outcomes, not just software adoption?

Elevate ↑

If you answered yes to any of these, Project Elevate is built for you.

Why Project Elevate?

The **real power of AI** lies not in the technology itself, but in its ability to **transform how work gets done**. While most Copilot programs focus on features, Project Elevate focuses on changing behaviours. Through real-world business scenarios, hands-on learning, and role-based use cases, employees learn how to **integrate AI into their daily work**. The outcome is **sustained adoption, increased productivity**, and greater return on your Microsoft 365 Copilot investment. Grounded in the ADKAR change model, the program is designed to make new ways of working stick.

One Framework. Three Adoption Journeys.

Leadership Cohorts

Help executives understand where Copilot fits into business priorities, decision making, organizational goals.

Best when

- ▶ Top-down sponsorship needed
- ▶ Concentrated, senior audience

Train The Trainer

Develop internal champions who can guide teams, answer questions, and sustain adoption long after rollout.

Best when

- ▶ Limited external delivery window
- ▶ Strong learning culture already exists

Organization-wide Deep Dives

Enable departments through role specific workshops and hands on learning connected to everyday work.

Best when

- ▶ Broad workforce with diverse functions
- ▶ Adoption depth matters more than speed

Ready to Elevate the way your business works?

Partner with Intech to shape your AI strategy, prove value, and scale with confidence.

What Your Organization Gains

Structured Adoption Journey

A clear path to move from Copilot access to everyday usage.

Role-Based Learning

Practical learning connected to real roles and workflows.

Change-Ready Teams

Teams gain the confidence to adopt new ways of working.

Measurable Business Value

Adoption outcomes tied to productivity and business impact

Hear from our Customers

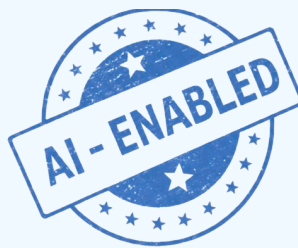

"It shifted the mindset — from 'this is scary' to 'let's get into it.' A powerful start, and the journey ahead looks even bigger." — **President, Embassy Ingredients**

"The training unlocked Copilot capabilities I didn't even realize were missing. It sparked a hunger to use AI more effectively and responsibly." — **DGM, IT Operations, Hubergroup**

"The team was guided on the correct approach to use Copilot, and the trainer explained the recursive process of refining prompts to achieve better results with live examples." — **R&D Team, A.T.E. Group**

Special Offer: Try Microsoft Copilot Business Free for 30 Days

What Is It?

A limited-time offer enabling eligible customers to **experience Microsoft 365 Copilot Business at no cost for 30 days**. Through Project Elevate, Intech guides your team through a structured adoption journey, helping users apply Copilot to real work, identify valuable use cases, and build a roadmap for broader deployment.
