MIGRATING TABLEAU DASHBOARDS TO MICROSOFT FABRIC

Seamless Migration Powered by Automation.

Unlock a seamless transition to Microsoft Fabric with our comprehensive migration assessment tailored to your analytics needs.

TAKE YOUR BUSINESS TO THE NEXT LEVEL

Intech's Tableau-to-Fabric migration package helps organizations modernize their analytics platforms quickly, securely, and with expert guidance.

Comprehensive System Evaluation

We assess your Tableau setup to identify dashboards, data sources, extracts, and custom features. Our evaluation highlights complexity, categorizes dashboards (migrate / archive/rebuild), and defines clear migration goals around performance, visualization, and governance.

Tailored Migration Strategy

Receive a customized migration plan that ensures smooth data transfer, accurate schema validation, and optimized performance. We map Tableau features to Power BI equivalents:

- Filters → Slicers
- Parameters → What-If Analysis
- Calculated Fields → DAX

Expert Guidance and Support

Our specialists provide hands-on support throughout the migration process:

- **Data ingestion into OneLake**
- **Rebuilding semantic models in Power BI**
- **Applying governance (Row-Level Security, workspace roles)**
- **Validating KPIs against Tableau outputs**

We ensure your team feels confident and empowered post-migration.

Business Outcomes

- **Lower analytics cost** through Fabric & Power BI consolidation
- **Faster insights** with OneLake-based architecture
- **Stronger governance** with centralized security & RLS
- **Future-ready analytics** aligned to the Microsoft ecosystem

Intech's Migration Approach
A proven, low-risk 4-step model

- **Discovery & Assessment -** Tableau dashboards, data sources, extracts, calculations, dependencies
- **Automated Rebuild -** Data ingestion into OneLake, semantic models in Power BI, DAX mapping
- **Validation & Governance** - KPI-to-KPI validation, RLS, workspace roles, security controls
- **Enablement & Go-Live** - User handover, documentation, adoption support

MIGRATING TABLEAU DASHBOARDS TO MICROSOFT FABRIC

Seamless Migration Powered by Automation.

Unlock a seamless transition to Microsoft Fabric with our comprehensive migration assessment tailored to your analytics needs.

TAKE YOUR BUSINESS TO THE NEXT LEVEL

Intech's Tableau-to-Fabric migration package helps organizations modernize their analytics platforms quickly, securely, and with expert guidance.

Intech Automation Advantage

- Automation script for Tableau analysis & mapping
- Faster dashboard complexity classification
- Reduced manual rebuild effort
- Lower migration timelines and risk

Intech has developed a script to automate these mappings, accelerating migration and reducing manual effort.

Why Choose Us?

- Benefit from a unified analytics platform with Microsoft Fabric.
- Experience seamless integration with Power BI, OneLake, and Azure.
- Achieve better governance, scalability, and cost optimization.
- Leverage Intech's automation script for faster, more reliable migration.
- Receive exceptional customer service and ongoing support.

About Us

Intech Systems, a leading Microsoft Solutions Partner, specializes in digital and app innovation, modern work, and data & AI solutions. With our expertise, we help businesses streamline operations, modernize analytics, and achieve remarkable efficiency.
