The Concept

1

2

3

WHAT IS THE KEY ADVANTAGE?

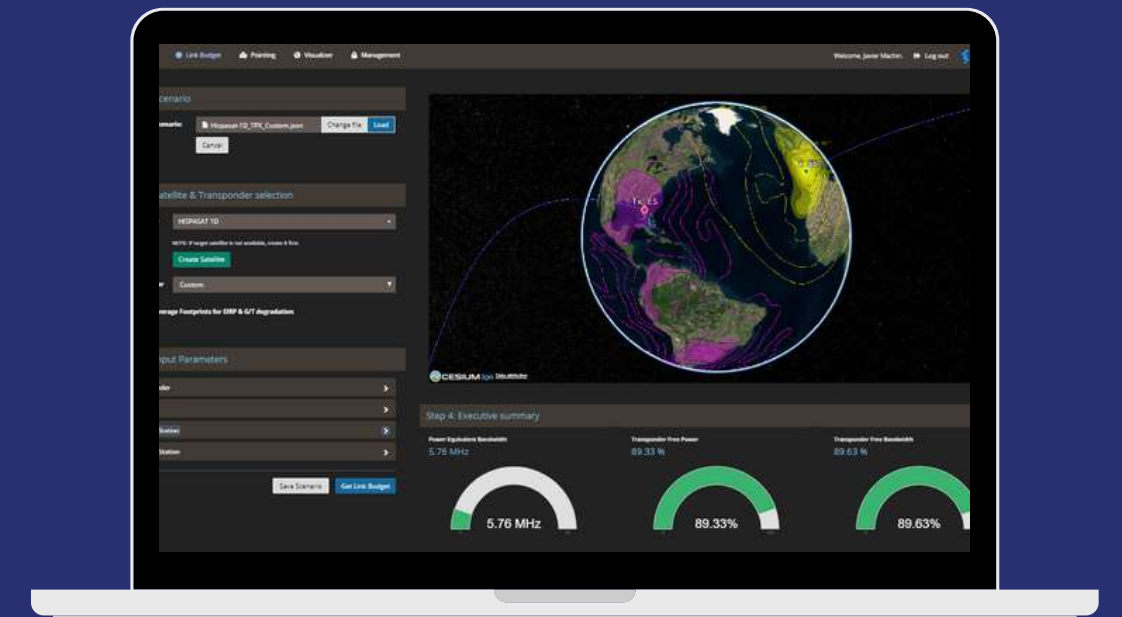

Easy to use web-based system. Low quantity of inputs to obtain high quality outputs in seconds

WHO IS THE USER?

For Technical and Commercial profiles. A time-saving tool, also useful for selling

WHY OUR TOOL?

We have gathered all our effort to make a complex process easy, user-friendly, with accurate results represented in a graphical report and incorporating the latest trends

FEATURES

1

USER-FRIENDLY

Based on cutting-edge technology

2

ITU STANDARDS

Based on ITU Standards

3

UPDATED DATA

New Satellites and Transponders from scratch

4

GRAPHICAL REPORT

Graphical results with PDF & Excel reports

Full Duplex Scenario

HIGH-END RESULTS

From one a simple interaction and with a low quantity of inputs, in a few seconds.

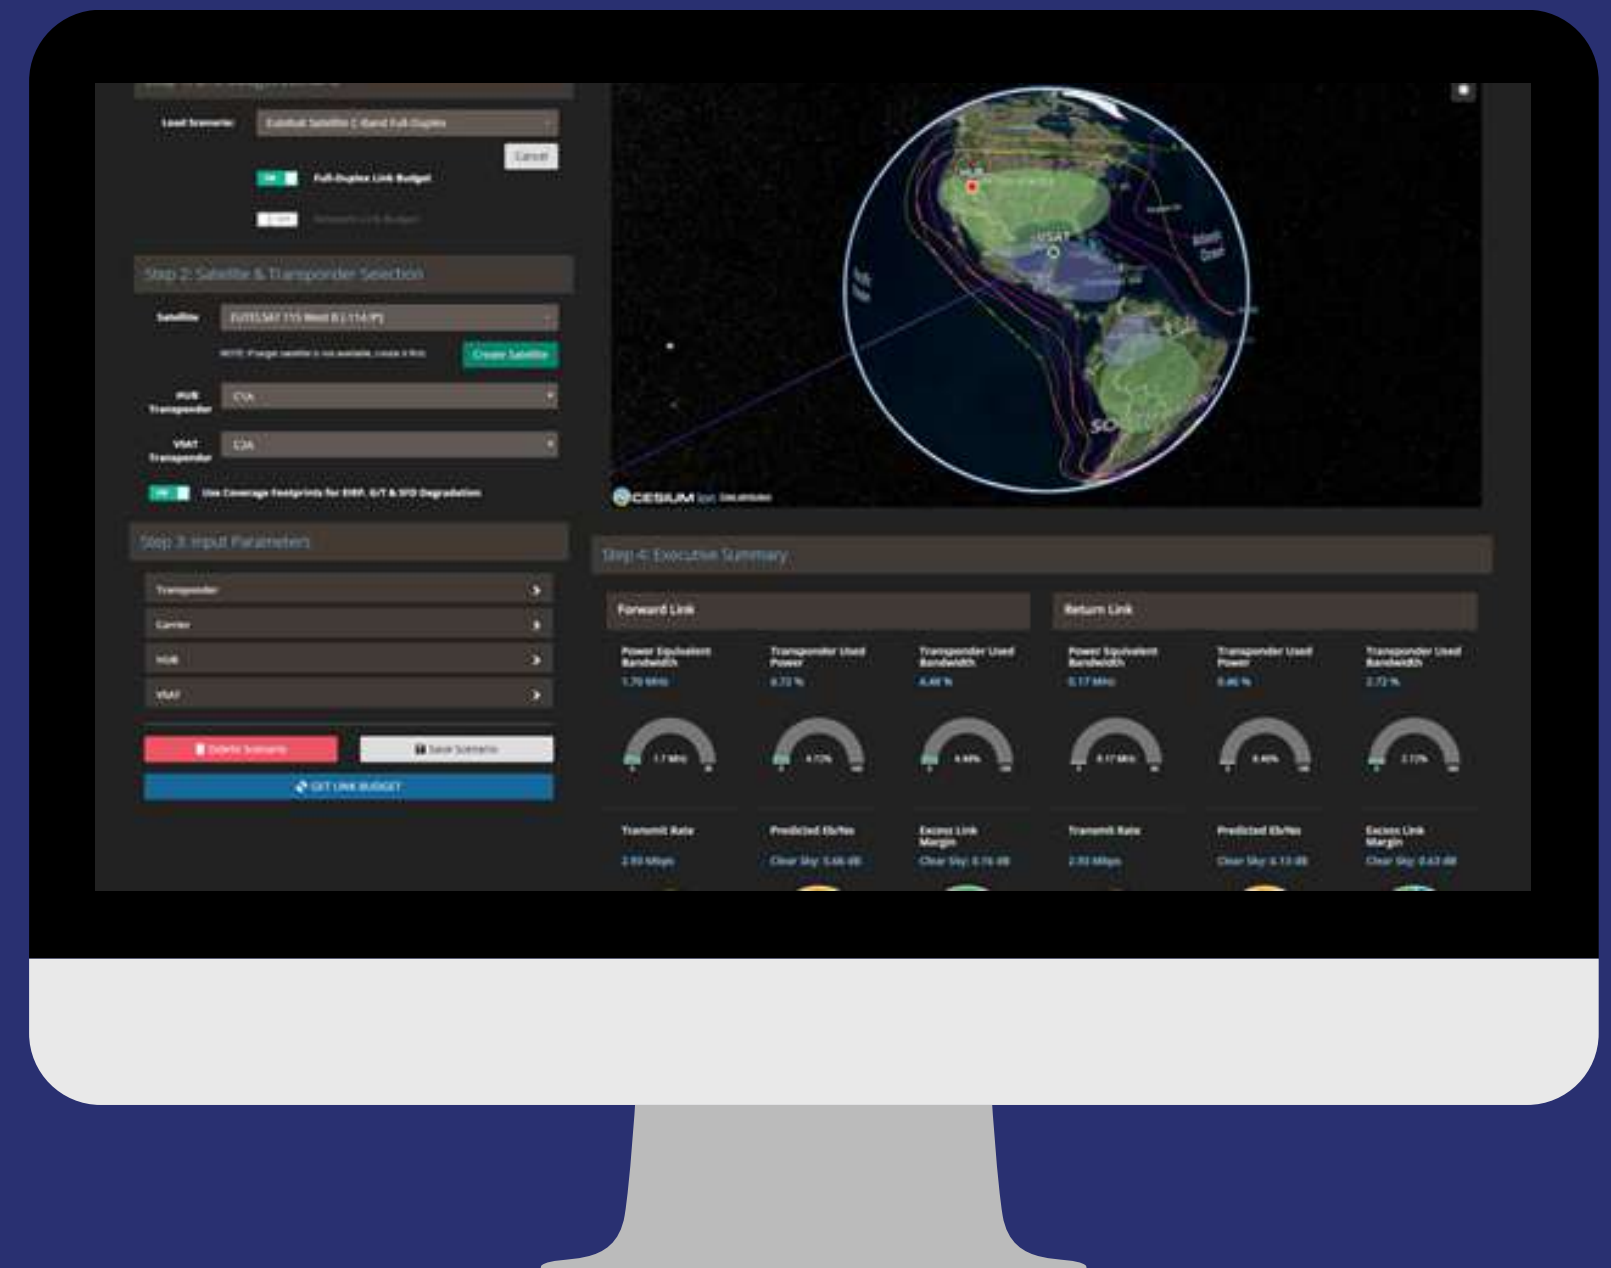

POWERFUL METRICS

Accurate forward and return link calculations.

EXPORTABLE DATA

PDF and Excel customizable reports with graphical representation.

Network Scenario

SEVERAL CALCULATIONS

Several link budget calculations in a selected area simultaneously

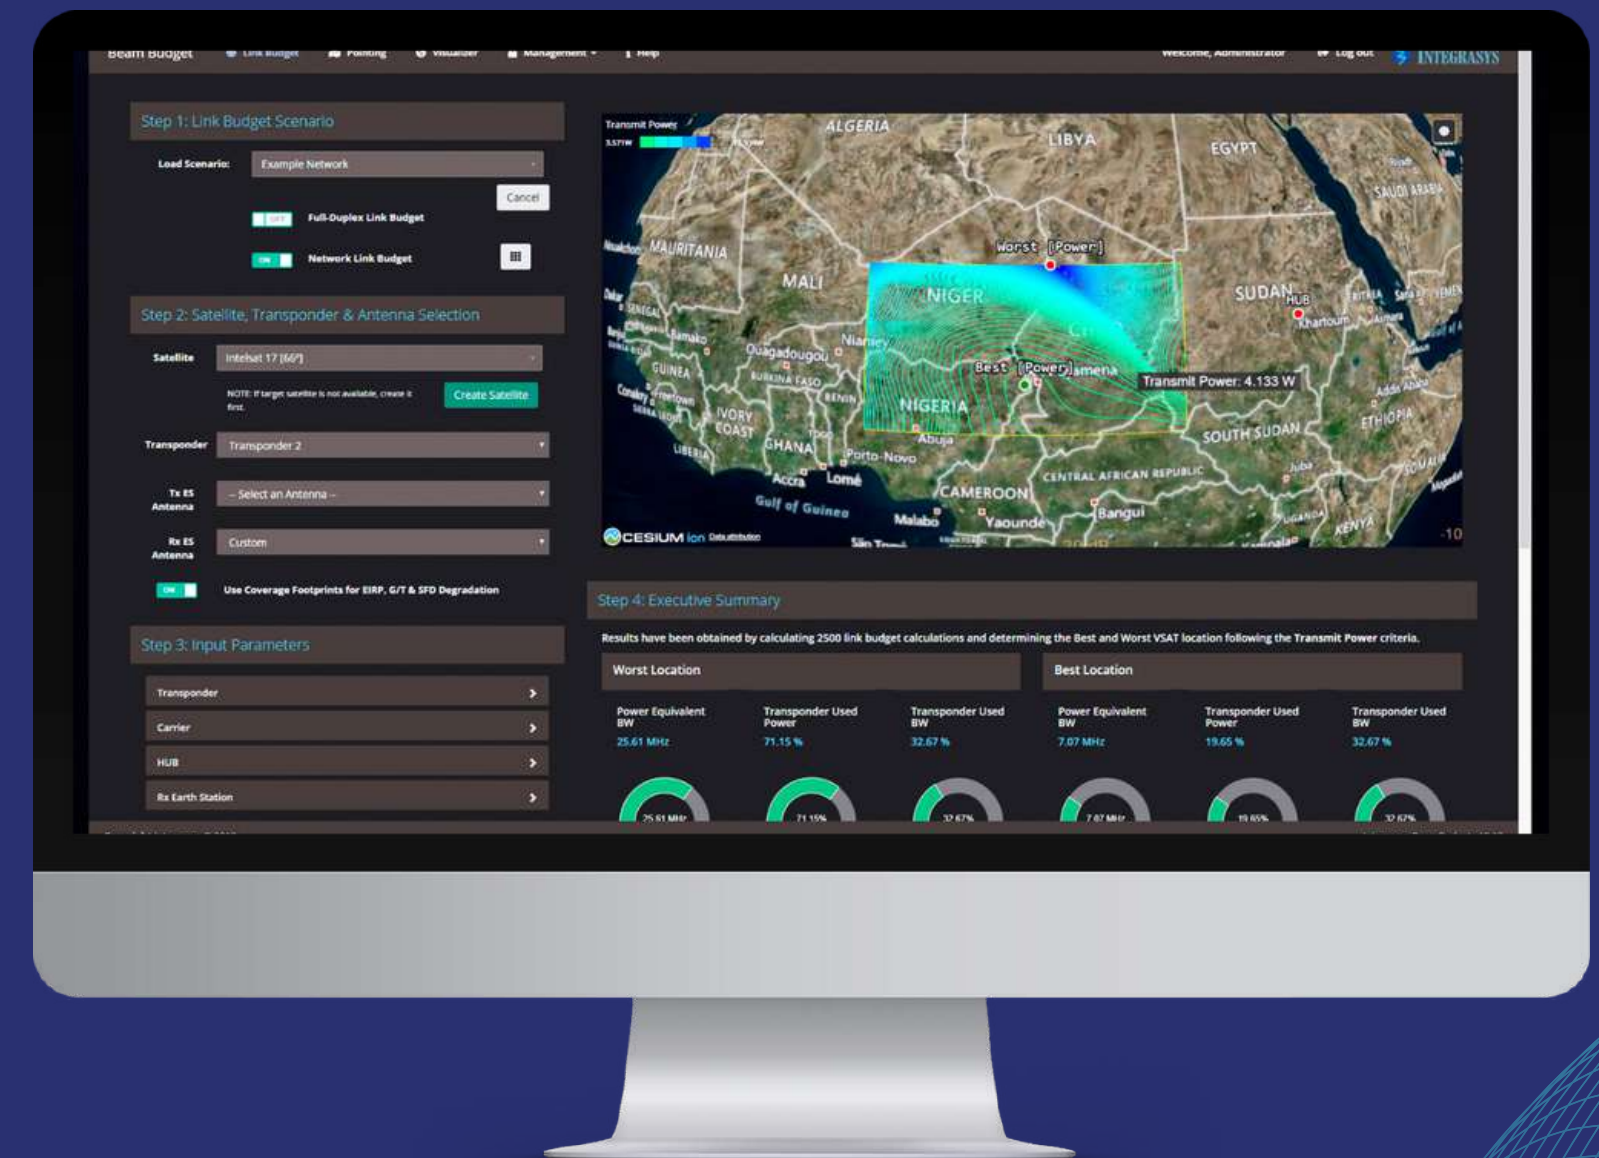

SELECT AREA CONTROL

Quick and easy area selection

QUALITY LOCATION

Best and worst location in the area selected

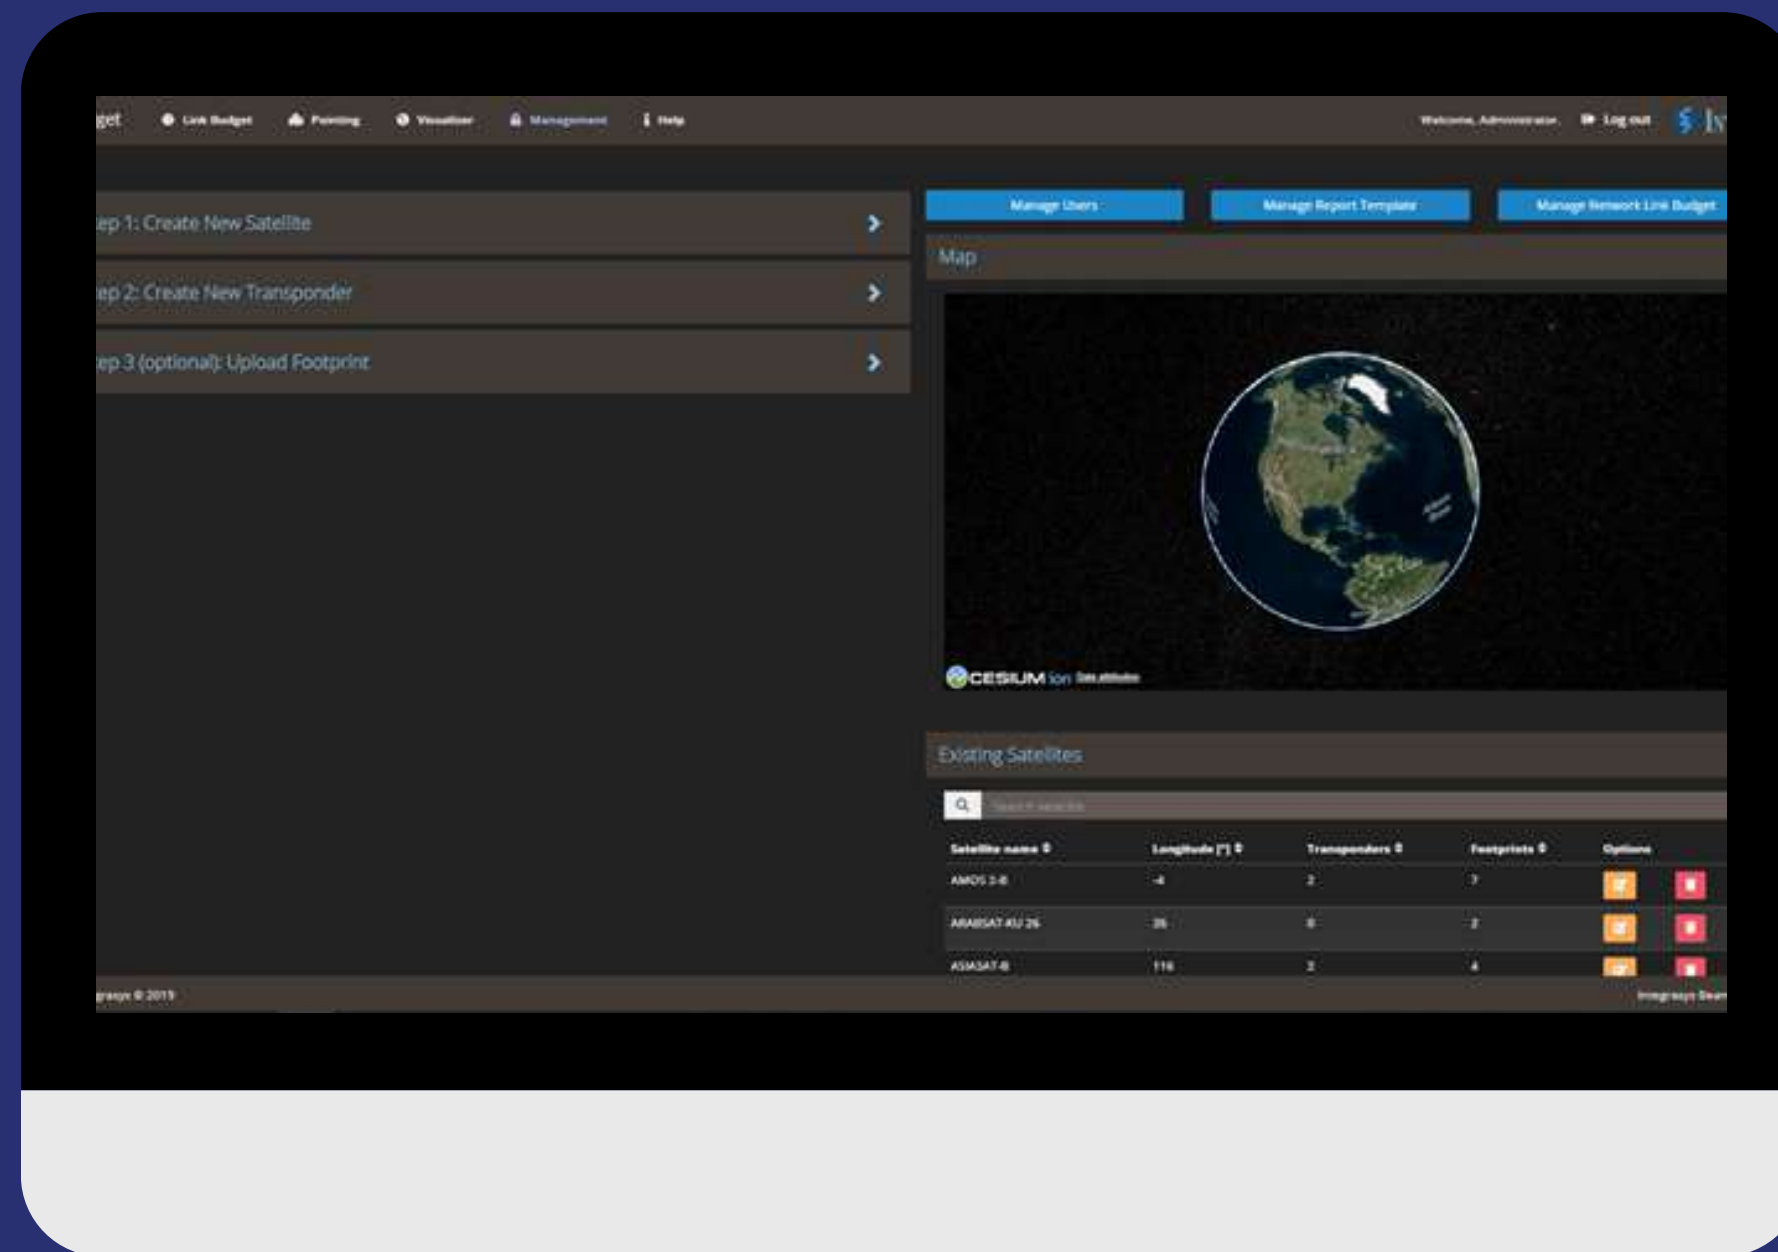

Managing Beam Budget

PROFILE LEVELS

User and admin level profiles

ADMINISTRATE

Unrivaled way to admin Satellites and Transponders

CHANGES ON THE SPOT

Create, delete and edit on the spot

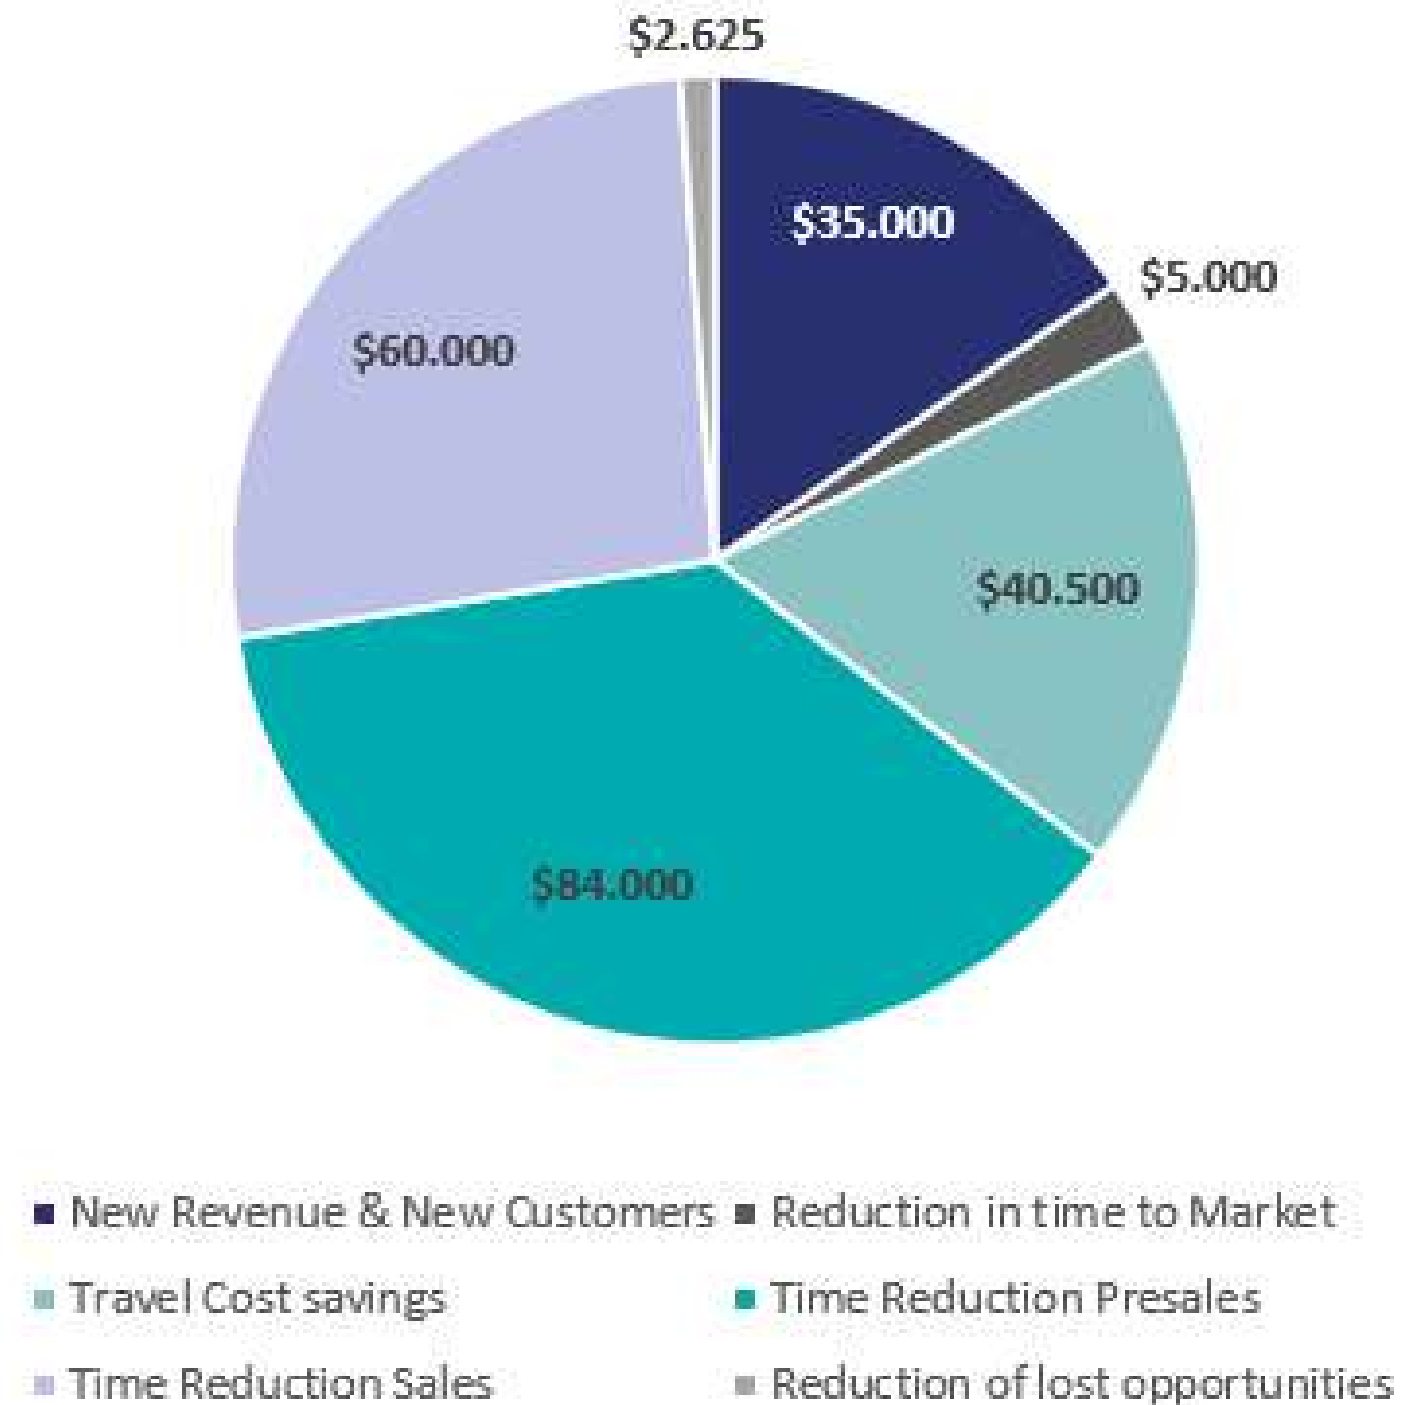

MULTIUSER

Multiuser company domain support

Key Benefits

Revenue & Cost Savings (Per Network)

Key Benefits

MINIMIZES TIME & EFFORT

WEB-BASED SYSTEM

REUSABLE SCENARIOS

POWERFUL USE
