Microsoft 365 Integrated Platform

In today's digital age, businesses undergo digital transformation to revolutionize the way they operate, collaborate, and engage with customers and vendors.

With increasing digital threats, business must defend against potential cyber attacks. The M365 integrated platform, when properly configured acts as a fortress protecting your digital estate and reducing your risks.

The foundation is comprised of four sections to optimize the balance of function with security:

- **Entra Identity Protection, Identity Access Management (IAM)**

- **Defender, Email & Apps Protection (ATP)**

- **Intune, Endpoint enrollment & protection (MDM/MAM)**

- **Purview, Data Protection & Compliance**
