OUT-OF-THE-BOX ERP SOLUTION FOR MANUFACTURING

Intelisense IT has developed an out-of-the box, fast time-to-value solution for ERP finance & supply chain management scenarios. The solution offers organisations a quick implementation timeline and a fixed fee for implementation professional services.

CORE FEATURES

Organisations receive a fully functional ERP system that sits within the wider Microsoft D365 F&SCM product family. Other benefits include:

RAPID DEPLOYMENT:

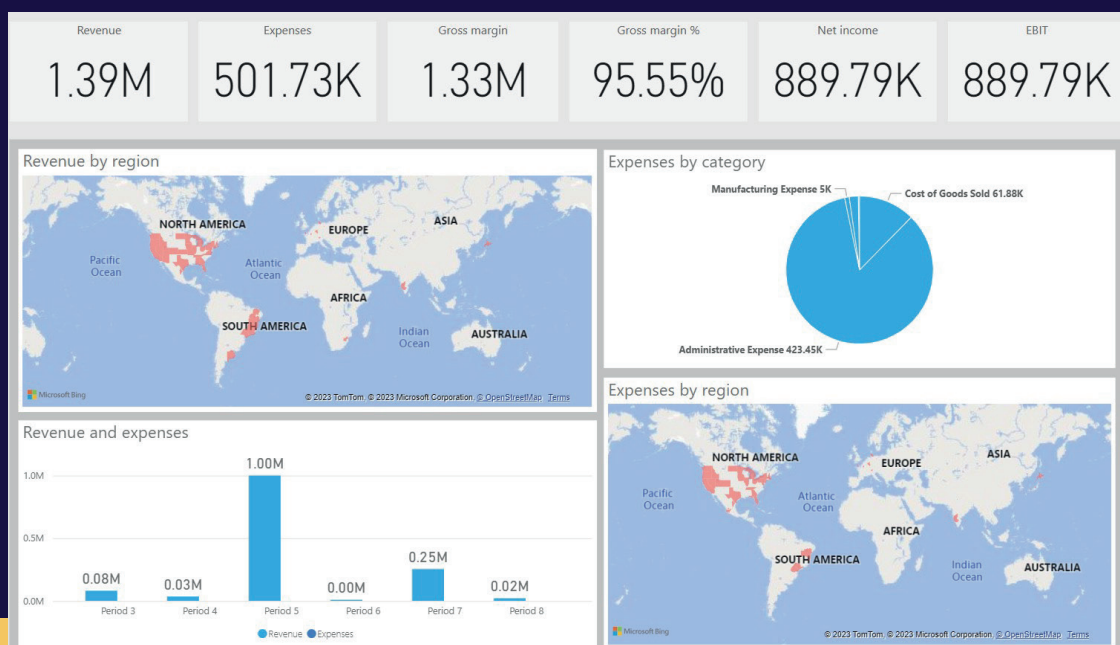

- Delivered within 90 days, utilising a waterfall methodology framework.
- Leverages Intelisense's out-of-the-box templates for reporting, integration, data migration, banking and lots more.

COMPREHENSIVE MODULES:

- 8 core finance modules.
- 8 core production & SCM modules
- Key HR modules

IDEAL FOR:

This solution is primarily designed for enterprise organisations exploring divestiture, acquisition, and want to consolidate group accounts into a single reporting entity; it's also suitable for proof of concept scenarios, as well as highly funded start-up entities that require the ability to unify all ERP processes.

WHAT'S IN THE BOX?

- General Ledger
- Accounts Payable
- Accounts Receivable
- Cash & Banking
- Tax
- Credit Collections
- Fixed Assets
- Item Costing

- Stock Management
- Master Planning
- Procurement
- Product Info Mgmt
- Sales & Marketing
- Adv WHS
- Product Control
- RMA

- Employee Records
- Security Roles
- Separation of Duties
- Departments
- Org Structure

BENEFITS:

REDUCED RISK:

This fixed solution de-risks the commercial investment into an enterprise grade finance solution that is the core foundation of the wider Microsoft ERP ecosystem of modules/solutions.

EASE OF MANAGEMENT:

The out-of-the-box approach means that the solution is easy to maintain in alignment with Microsoft upgrades and internal competencies.

REQUIREMENTS:

Organisations must purchase the minimum prerequisite of licenses for F&SCM from the outset of the project.
