

An aerial night view of a city, likely Los Angeles, with a dense grid of colorful circuit lines overlaid. The lines are in shades of purple, blue, green, and yellow, with small dots at the intersections. The city lights are visible in the background, and the sky is dark blue.

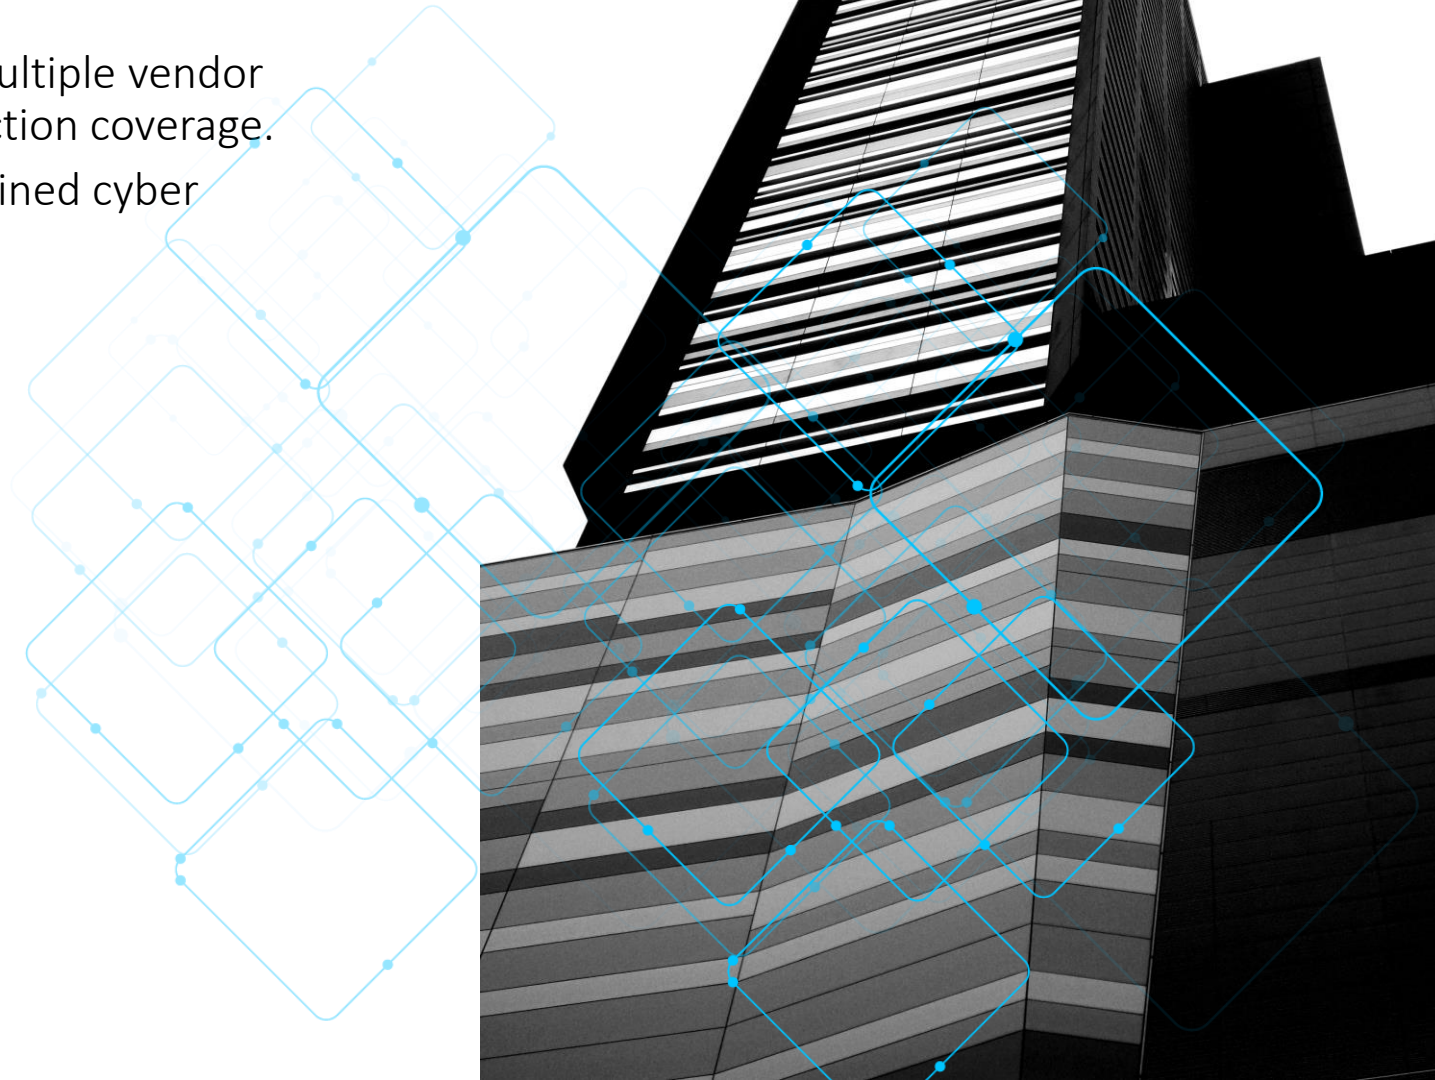

IntelFinder

**ACTIONABLE INTELLIGENCE
YOU CAN'T AFFORD TO MISS**

Threat Intelligence is Expensive and Therefore Difficult

- For larger enterprises to rely on a multiple vendor tactic to maximize their threat detection coverage.
- For organizations with more constrained cyber security budgets to invest in.

The Solution

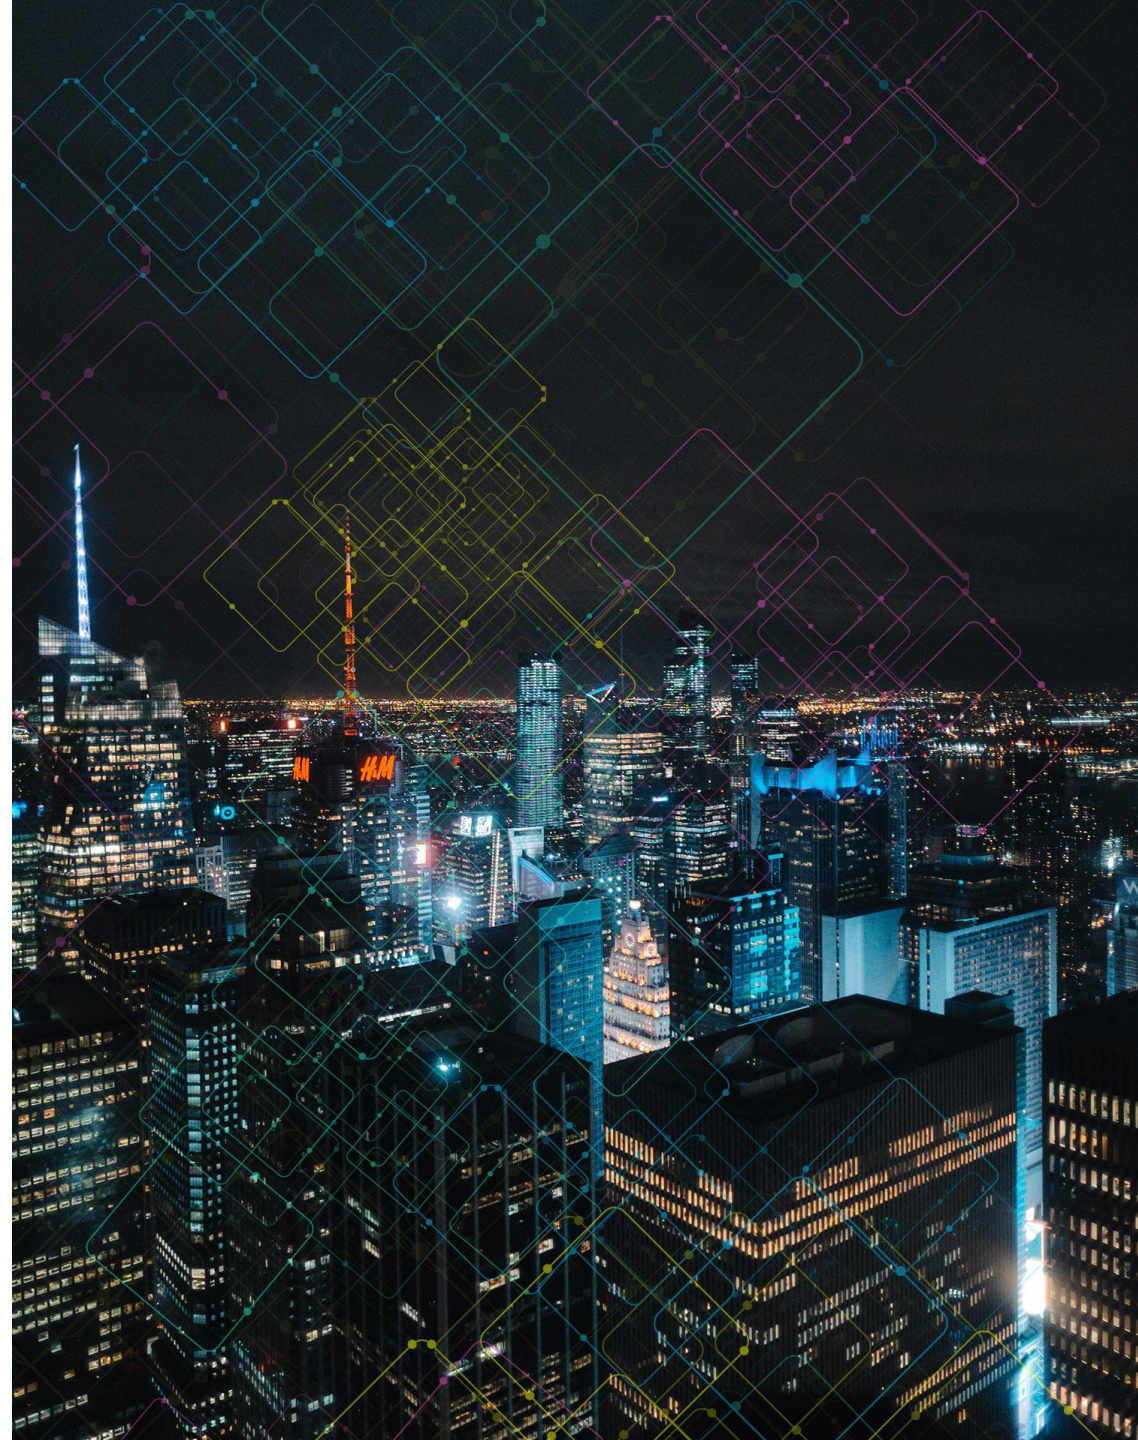

IntelFinder

IntelFinder offers a full, comprehensive,
all-inclusive, threat intelligence solution
for only \$250 a month per brand (on an annual subscription)

How is it Possible?

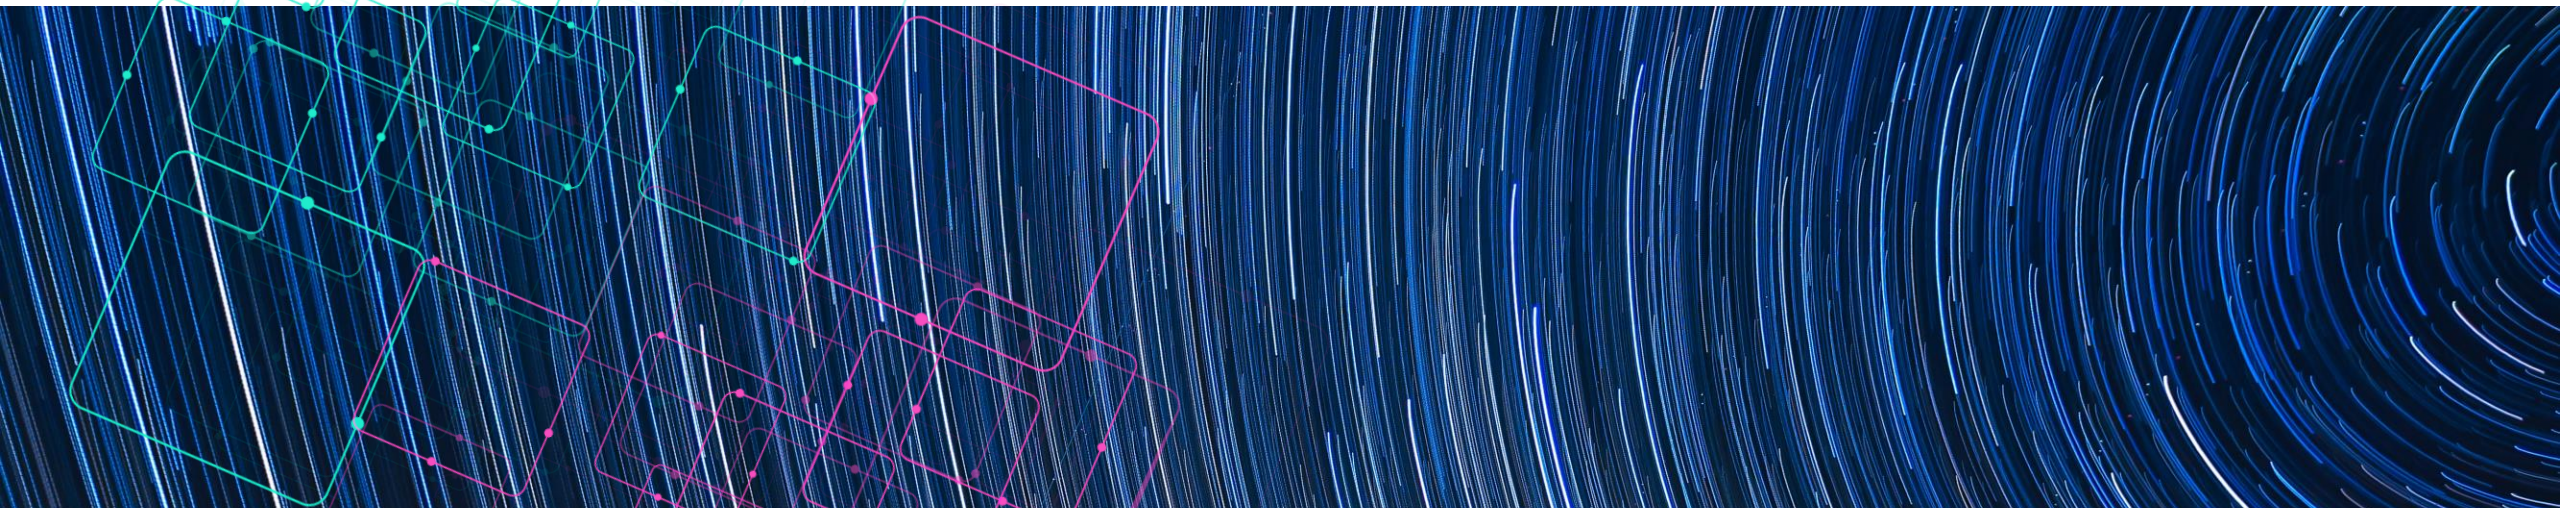

- IntelFinder is the world's first fully-automated threat intelligence solution. No analysts are involved in the intelligence generation process.
- A scalable SaaS-based solution for delivering customer-specific threat intelligence.
- Powered by our proprietary web intelligence technology that is used by fortune 500 companies and government agencies.
- We monitor various sources on the web to identify a myriad of threats against your organization, its brands and employees.

Our Modus Operandi

- A holistic approach to intelligence – if it affects your business, it's relevant
 - Similar Domain Registration – threat of Phishing, brand abuse, cybersquatting, etc.
 - Leaked Employee Credentials
 - Rogue Apps
 - Leaked Documents
 - Leaked Code
 - Domain Hijacking
 - ... and many more

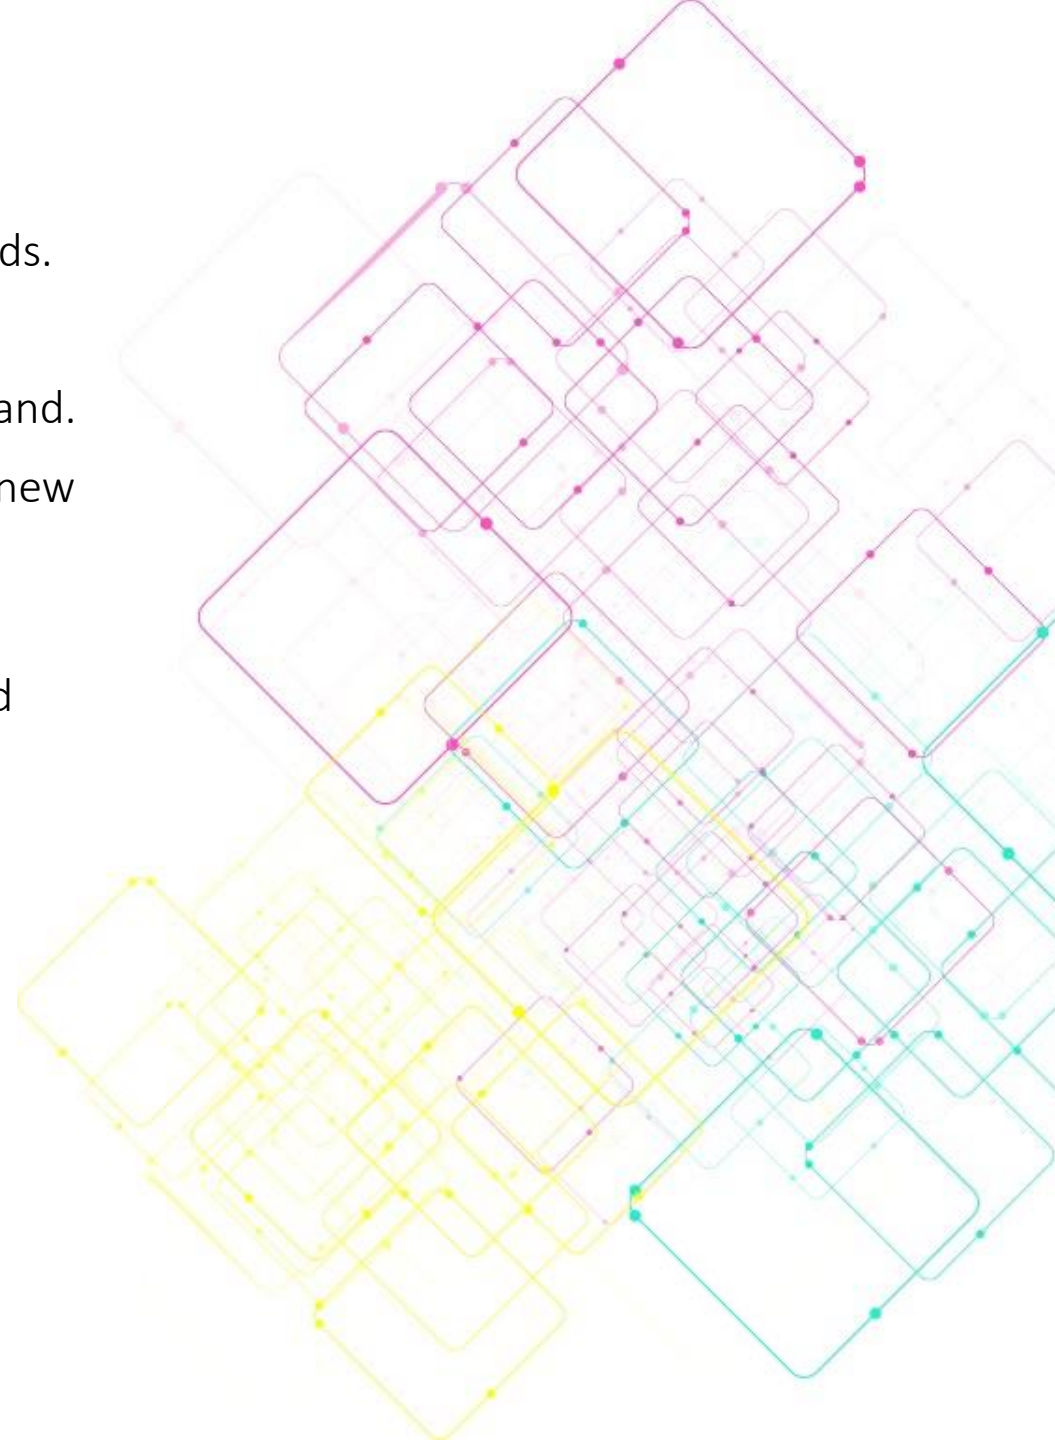

Features & Benefits

- Customer specific, relevant and actionable intelligence – no generic feeds.
- Remediation recommendations provided for each finding.
- All-inclusive – no limit on number of assets that we monitor for your brand.
- What we have is what you get – we continuously add new sources and new monitoring capabilities, at no additional cost.
- Unified dashboard – all alerts, notifications and recommendation.
- Simple to use REST API and Webhooks to minimize integration costs and effort.

Did we mention the low cost?

Testimonials

“As a leading cyber security company we must prevent those who try to damage our reputation. IntelFinder helps us with automated external intelligence with a low numbers of false positives!”

Jonathan (Jony) Fischbein, CISO at Check Point Software

"IntelFinder is one of several services utilized by our cyber threat intelligence team. They help us improve our intelligence coverage, as they report on certain important threats that the others simply do not cover. The platform is super simple to use, making it easy for us to quickly go over the alerts and understand what is happening.“

Kobe S, Cyber & Threat Intelligence Manager at Signify (Formerly Philips Lighting)

"We knew we had a rogue mobile app on the official Android app store, but we didn't know about all the mirror sites where it was still on. IntelFinder provided us the visibility we needed to identify other locations where it was available, while also alerting us of additional potential threats against our company.“

Thierry Nilles, Head of Security at talent.io

"As a leading company in the crypto world we constantly face targeted cyber attacks and the risk of the “Unknown Unknowns” is always high. IntelFinder shed the light on the unknown and expanded our visibility and coverage of external cyber threats in a cost-effective manner. The platform itself is user-friendly and easy to use. It's a must have tool in the CISO's arsenal!“

Zurab Akhvlediani, CISO at FortuneJack

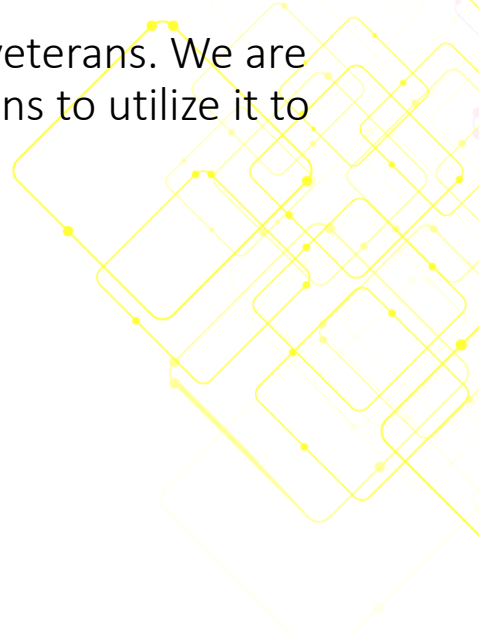

Who We Are

We believe that for organizations to better protect themselves, they should maximize their coverage and visibility into external threats

Our goal is to make threat intelligence accessible to all organizations, whether they have existing intelligence operations, or zero experience in the field

IntelFinder is designed and operated by intelligence veterans. We are passionate about intelligence and helping organizations to utilize it to its fullest potential.

Our Management

IDAN AHARONI Co-Founder & CEO

- A 15-year veteran in the fraud and cyber security industry.
- Former Head of Cyber Intelligence at RSA, the Security Division of EMC.
- Recipient of “Legends of Fraud” award for pioneering and innovating in the space of fraud intelligence.

ADI AHARONI Co-Founder & VP Business Development

- 8200 Alumni (Israeli NSA).
- Web intelligence expert for both government and private sectors.
- Previously Head of Credit Card Business with one of Israel’s largest banks.

**IF IT THREATENS YOU AND YOUR BUSINESS
SHOULDN'T YOU KNOW?**

A nighttime city skyline with light trails from traffic on a highway in the foreground. The scene is overlaid with a complex network of glowing lines and nodes, suggesting a digital or data network. The text is centered in the upper half of the image.

Finally
The actionable threat intelligence you
can't afford to miss... AND DON'T NEED TO.
