WHY CHOOSE US

Culture of innovation

With technology being our craft and our passion, we are committed to making an impact and leading change together with the world's top innovators

Verticalized approach

We combine market-leading technology expertise with deep industry knowledge to address our clients' specific objectives and business context

Long-term partnership

We provide more than mere services by sharing our clients' goals, values, vision, and mission to exceed expectations and become a trusted partner in the long run

Flexibility in cooperation

We prioritize our clients' business needs and offer flexible engagement models to ensure the best possible fit for their goals and requirements

HOW WE ENABLE BUSINESSES TO STREAMLINE THEIR DATA JOURNEY

The Intellias outcome-oriented team provides comprehensive support throughout your data lifecycle to help you break down legacy data silos and create a holistic environment for modelling and predicting new market opportunities. Whether you need assistance in making informed decisions for business development or require data platforms and solutions to enhance your operations, we will help to put your data to work within the context of a larger strategy developed in sync with your business objectives.

An end-to-end analytical platform for the Nordic-based credit management company, which helped to align cooperation between different branches, reduce risk involved in loan approval process, and obtain deep insights into organization's performance

A business intelligence platform that covers reporting and advanced analytics needs of the world's leading rubber products manufacturer to enable predictive inventory management and unlock real-time insights into regional sales potential

Existing data infrastructure migration for a major national telecoms company, which ensured seamless transition of organization's business functions from on-premises to the cloud, as well as enabled significant reduction of TCO via native Azure services adoption
