WIT Effort Estimator

The excess WITSIDE approach

01.
Identifying & categorizing the different types of functionalities & assigning weights to them

02.
Apply structured questionnaires to assess analytics maturity, data quality, data volume & frequency

03.
Adjust the corresponding weight categories to match more specific project related measures

04.
Organize a focused 2-hour workshop based on semi-structured questions

05.
Generate the Estimated Effort report
