

Bring Your Data to Life with Power BI

Transforming Data into Relevant & Actionable Insights.

Whether you're new to Power BI or already using it in an advanced capacity, Intellinet can help ensure you are getting the most out of your investment.

At Intellinet, we take an all-encompassing approach when working with our clients to determine their data and information needs. Using our Pragmatic Design Thinking approach, we work closely with your team to understand your business strategy, unique needs, and desired experiences to recommend and architect the right solution that will enable you to improve visibility to data and provide more efficient decision making.

Get Started Today

Half-Day Briefing

During this half-day session, we'll discuss your current landscape and business needs. You'll walk away with a conceptual roadmap of next steps needed to address your business requirements.

Power BI Assessment

Our experts will work with your key stakeholders to understand goals and challenges and provide your team with proper guidance and a roadmap for implementation of high-value use cases.

User Experience Assessment

Our team will work closely with your key stakeholders to analyze and identify the current usability of your reports and develop a plan and design to enable your reports to deliver maximum value.

Power BI Use Case Proof-of-Concept

Intellinet experts will work with your team to interview stakeholders, assess your environment, and create a proof-of-concept for a select department or team based on your sample data.
