

Teams Calling ROI Workshop

Plan and Begin Deployment of Your Modern Voice Solution

Calling in Teams provides the features organizations need to deliver seamless, collaborative experiences for employees, business partners and customers. With Intellinet's Teams Calling workshop, Intellinet can help you navigate the complexities of a calling solution including network remediation, O365 service deployment, telephone number provisioning/porting and device deployment.

Following Intellinet's Teams Calling ROI Workshop, you'll walk away from this engagement with a high-level business case for Teams Calling as well as an implementation plan with cost estimates.

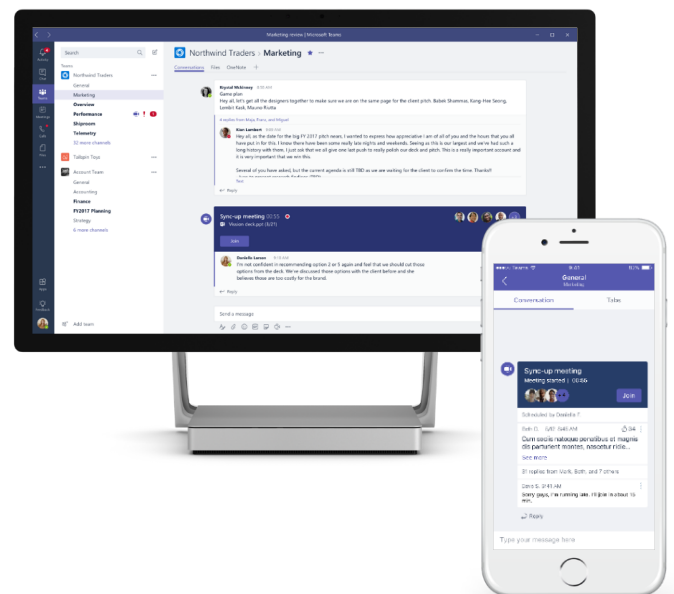

Get Started Today

1 Week ROI Workshop

Approach & Deliverables:

During this workshop, Intellinet experts will provide:

- An evaluation of environmental and workload analysis, including existing infrastructure and telephony/PBX state
- Demonstration of the end-to-end Teams Calling experience to showcase Microsoft Teams Calling as your telephony solution
- A high-level business case for ROI
- Direction on the persona migration into a modern collaboration and communication environment
- Showcase the rich portfolio of complementary 3rd party applications and devices
- An implementation plan, including costs estimates, to make this a production implementation

1 Week | \$4,500
