

intenseye at a Glance

Empowering EHS Leaders to Modernize Workplace Safety with AI

Intenseye is on a mission to transform workplace safety with computer vision AI. By providing 24/7 visibility into unseen hazards, ergonomic risk factors, and leading indicator data, our platform empowers environmental health & safety (EHS) leaders to reduce work-related injury and illness rates, improve compliance, and save lives.

What We Do

Reveal Unseen Hazards

From crane area violations to electrical hazards, Intenseye automatically flags unsafe acts & conditions before they escalate

Improve Safety with Data

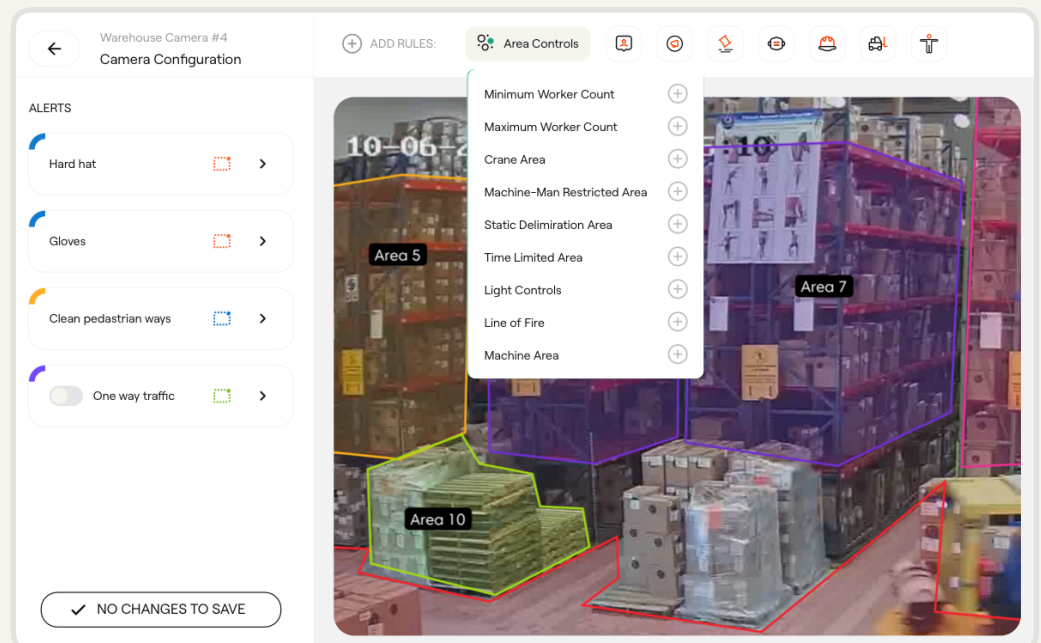

We don't just detect hazards, we provide video footage, analytics, and more to help EHS leaders make decisions that save lives

Boost the ROI of EHS

By automating manual workflows, driving new efficiencies, and even helping optimize insurance plans, our ROI goes beyond facilities

How It Works

- 1 Connect**
Intenseye to existing CCTV cameras in minutes via cloud or hybrid options
- 2 Deploy**
Any of 45+ prebuilt rules to automatically detect unsafe acts & conditions
- 3 Protect**
Workers by using leading indicator data to proactively improve safety outcomes

What We Detect & Optimize

PPE Compliance

- Apron
- Cal Suit
- Glasses
- Gloves
- Hard hat
- Hearing muff
- Mask
- Reflective vest
- Sleeve

Area Controls

- Crane area
- Light controls
- Line of fire
- Machine area
- Restricted area
- Max/min workers
- Static & dynamic delimitation
- Time limits

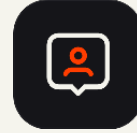

Housekeeping

- Pedestrian ways
- Vehicle roads
- Leakage & spill
- Open/closed door
- Unattended object

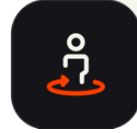

Vehicle Controls

- Speed limit
- Vehicle-pedestrian interaction
- Vehicle-vehicle interaction
- Vehicle zone
- Vehicle PPE
- Restricted area

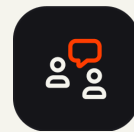

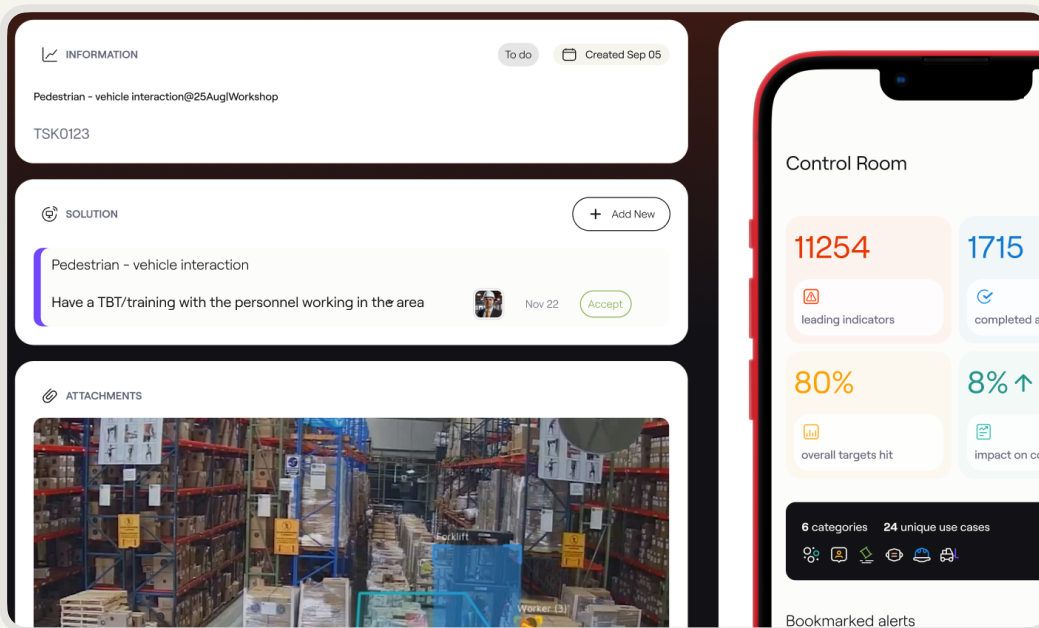

Behavioral Safety

- Bannister use
- Climbing
- Contact with electricity
- Grouping
- Pedestrian way
- Restricted height
- Social distancing
- Worker down

Ergonomics

- Trunk position
- Trunk twisting
- Trunk bending
- Neck position
- Neck bending
- Lower & upper arm position
- Arm working position
