

Top-Reference: Bayer AG

eFiLiA IP is the Electronic File Lifecycle Application for the comprehensive management of Intellectual Property.

Based on the know-how of the patent department of Bayer AG, a solution was designed in cooperation. In the year 2000 Interasco had already been commissioned by Bayer AG to implement a web-based solution for the processes in the IP & Law department of the group.

eFiLiA IP is eFiLiA's special application optimally customized for patent and contract management.

Today eFiLiA is used as a framework for the administration of electronic files and processes worldwide in different departments of Bayer AG.

For Bayer, eFiLiA IP means a smooth interaction of 42,000 users and more than 3.5 million files - as well as the optimal handling of a company's intellectual property.

About Interasco

Interasco GmbH was founded in 2000. Our experienced IT experts develop comprehensive software solutions for the administration of intellectual property rights in industry and law firms.

Based on existing IT infrastructures, a wide variety of company and subject specific processes are mapped, integrated and optimally supported using state-of-the-art software development processes, a mature quality management system and powerful frameworks.

Interasco is a certified partner of Microsoft and ORACLE.

Our customers include companies such as Bayer, Schaeffler and BMW.

eFiLiA IP

Enterprise IP Management Software

... Worldwide access to all your files, due dates and documents

... As a cloud service or in your environment

Intellectual Property Management

Innovations need protection - from the idea to the product. The globalized economy does not forgive mistakes in defence of patents and rights. Modern companies therefore optimize their Intellectual Property processes via IT solutions.

Intellectual Property Management includes:

- Electronic administration of files
- Integrated document management
- Calculation and monitoring of deadlines and due dates
- Organizations and persons and their roles
- Costs, payment of fees and allowances
- Employee invention remuneration
- Portfolio management
- Communication and collaboration with specialist departments, attorneys and government offices
- Mapping of your workflows
- Support for decision-making procedures

Document management, groupware, appointment management - with these IT infrastructures alone, the complex processes in IP management cannot be successfully and comprehensively mapped.

Therefore Interasco brings together the functionalities of different systems via one business framework: eFiLiA (electronic File Lifecycle Application).

eFiLiA integrates existing IT systems, merges documents of all types and sources into electronic files and supports company and business processes via transparent workflows. eFiLiA is flexibly configurable, easy to learn and quick to introduce.
