

- ✓ Your clouds.
- ✓ Your connectivity.
- ✓ Your rules.

## Take full control of your cloud connectivity with InterCloud Autonomi

- » Define your project requirements and configure the right connectivity at software speed – wherever and however you need it with a platform that brings together multiple providers for the best possible solution.
- » Enjoy a seamless customer experience as you access market-leading network connectivity features and providers through our self-managed platform, including InterCloud's global private backbone and global network partners.
- » Deliver digital infrastructure projects and services quickly, make agile decisions about your setup, and run a smooth network operation.
- » Step into the future where you're in charge, shaping your network to boost your business's performance without limits.

### Unlock operational excellence

Increase operational efficiency with a single platform and create multiple infrastructures in separate workspaces, streamlining design, maintenance, and overall management.

### Go global with ease

Tap into our expansive network with an ever-growing number of network providers and physical locations and multiple bandwidth options to ensure seamless and scalable connectivity globally.

### Experience seamless integration

Easily integrate InterCloud Autonomi with your existing cloud infrastructure and tools using your favorite DevOps automation tool, ensuring a smooth and efficient workflow.

### Boost collaboration power

Foster effective teamwork by sharing multiple solution designs in workspaces, streamlining collaboration and supporting the needs of your internal or external customers.

### Trust your technical design

Get full visibility and transparency on each component of your service, empowering you to make informed decisions and design your network with confidence.

### Unleash financial freedom

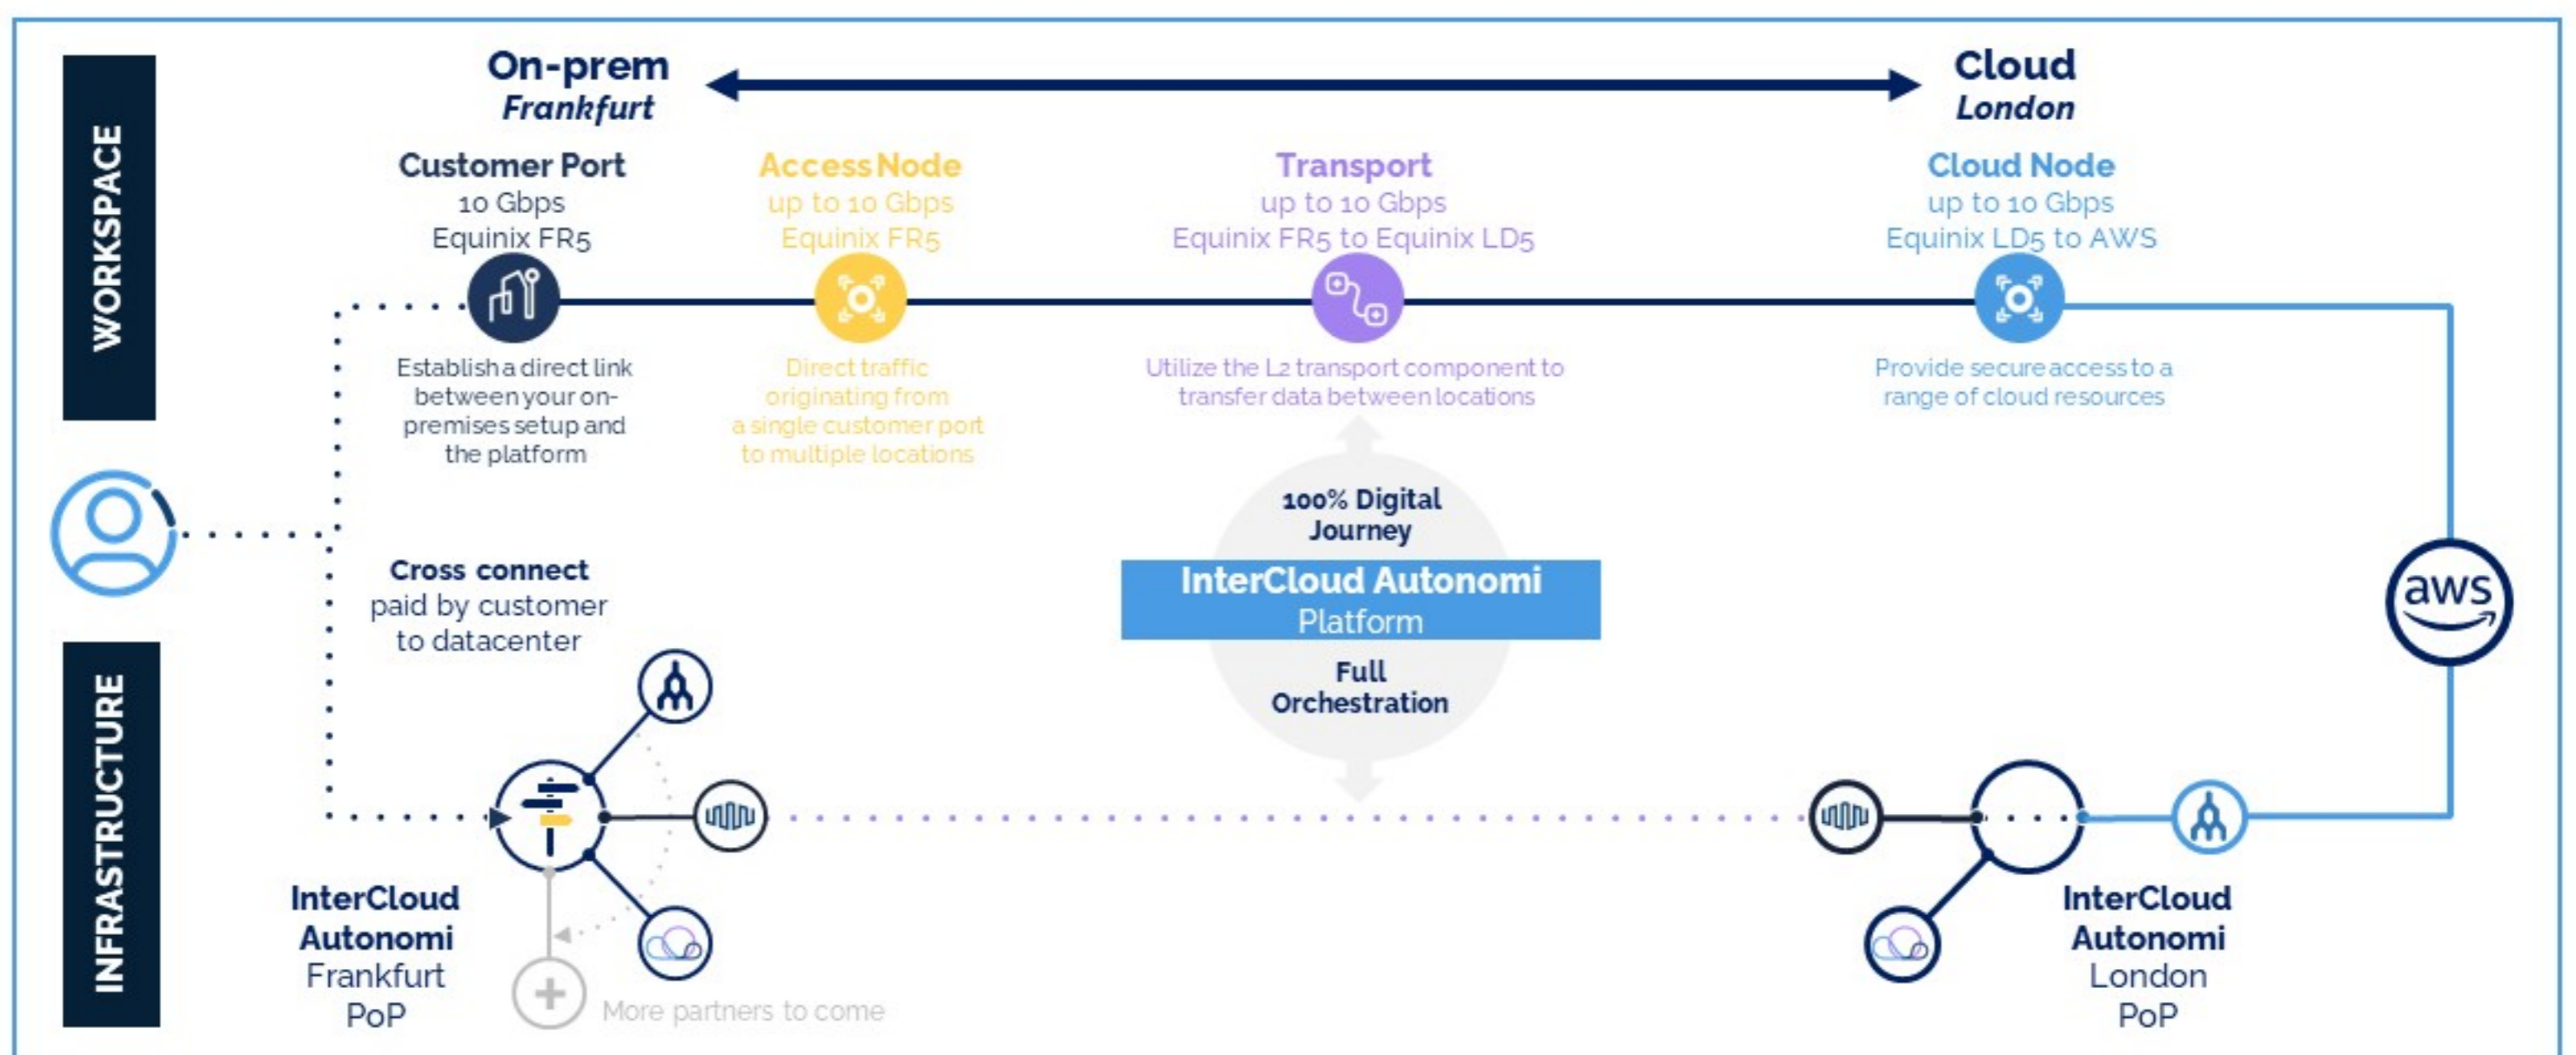

Enjoy peace of mind with no strings attached. Access leading network features from major players in one place and benefit from our pay-as-you-go model.

## Platform features

- » One platform to access market-leading networking features and providers via one platform, including InterCloud's global private backbone and global network partners.
- » Easy access to hybrid and multicloud environments including AWS, Google Cloud and Microsoft Azure.
- » Real-time analytics of your network performance and dashboard visibility into all infrastructure from a single pane of glass.
- » Deliver agility and create cloud connectivity projects with ease, when you need to, how you need to, with complete control.

### Use case: What we build, what you get

Using InterCloud Autonomi you take control over the connectivity you need, the network partner you wish to use, the SLAs you require as well as the locations and clouds you need to connect. In moments. And all in a few simple clicks.

### Get in touch to see how InterCloud Autonomi will support you to:

- ✓ Enable move to cloud initiatives
- ✓ Power your workload migration projects
- ✓ Enable rapid disaster recovery set-up
- ✓ Support your continuous integration and deployment processes
