Business Process Review (BPR)

Microsoft Dynamics 365
Business Central

Time Required: 1 week

Cost: $10,000

During a Business Process Review, professional consultants from InterDyn Artis will conduct a series of interviews with your key staff to learn pertinent aspects of business objectives, information flow and functional requirements. Following completion of the processes described above, InterDyn Artis will prepare a Functional Design Document that will detail the required software components and implementation services necessary to meet your objectives.

Information obtained may include:

- Executive/Management overview, including future company goals
- Current Processes and Software Functionality
- Desired Software Functionality
- Reporting Requirements
- Usability Requirements

In addition to interviews, InterDyn Artis consultants may observe your personnel functioning in their current environment to assist in determining workflows, examine existing documentation and software, and review the existing hardware infrastructure.

Areas to be reviewed include:

- Financial Management
- Supply Chain Management
- Customer Relationship Management
- Jobs (Project Accounting)
- Service Management
- Manufacturing
