

Microsoft Dynamics 365 for Financials

The Right Cloud Option for Your Business

Pricing and Licensing

The Microsoft Dynamics 365 pricing model gives you flexibility to find a plan that works for your business now and in the future. It's your choice: opt for a Full User or Team Member license and get monthly plans with apps packaged for savings.

Two Different Licenses

All licenses include automatic product updates.

Full User

Full Users leverage the majority of business apps' functionality. They have also been referred to as "power users."

Team Member

Team Members predominately consume data and complete light tasks such as time entry. They are also called "light users."

*The Full User license includes the rights for one external accountant user to access the service at no additional cost. The license for this user has to be requested separately.

Pricing Options

	Most Popular
