

Interlake Portfolio

Azure Fundamentals for ISVs

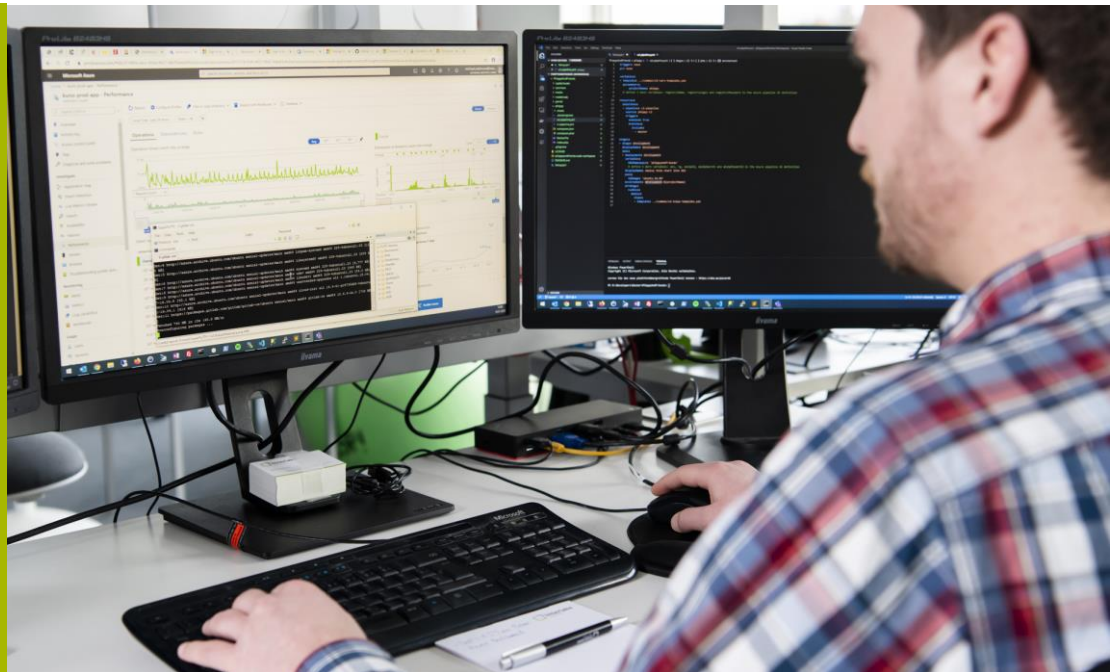

We are Azure Cloud Native Application Specialists providing support in technical implementation through:

Technical Enablement

#rehosting
#rearchitect
#operations

Solution Enablement

#coaching
#consulting

At Interlake, we are not only making digital change possible for everyone in the company, we also provide the tools and guidance necessary to make your digital transfer of knowledge successful.

How Customers benefit from Cloud Native

Our Cloud Journey Workshop will give you an insight about the benefits and challenges results with a transfer to the Azure Cloud.

You will hear about tips and tricks, best practices to successfully start your future with the cloud. Our goal is, to give you an excellent idea about the development of cloud applications in Azure.

Let's discover together how Microsoft's Azure Platform will accelerate the journey to the cloud and give your organization a competitive advantage.

Support your organization in delivering services to your customers, which are outperforming their expectations. With the shift to the cloud you are not only providing flexible infrastructures and increased performances, but also create the basis for innovative business models.

Our online workshop will take place via Microsoft Teams. For registration and further information's please contact us.
