END TO END MANAGED SECURITY WITH MICROSOFT XDR & SENTINEL

Maximizing security effectiveness through best-in-class implementation.

DO YOU WANT TO MINIMIZE YOUR RISK OF DATA BREACHES?

Cybersecurity is a top priority for today's business. Disruption due to malware or the risks associated with data breach can cost millions. Due to the focused efforts of threat actors, organizations deal with attacks regularly and need to implement defense in-depth solutions that minimize the risk of a breach AND limit the impact of a breach if it occurs. Microsoft is a leading player in the integrated security market with Defender XDR that protects across the entire cyberattack kill chain, but maximizing the effectiveness of the tools requires correct implementation and an effective response plan. Interlink Cloud Advisors and CriticalStart have partnered together to provide a best-in-class implementation and managed detection and response capabilities built on the Microsoft Defender XDR and Microsoft Sentinel platforms.

OVERVIEW

MICROSOFT SENTINEL

- ✓ Deploy Microsoft Sentinel log analytics workbook
- ✓ Deploy and configure baseline Microsoft Sentinel Analytics rules
- ✓ Deploy and configure baseline Microsoft Sentinel Workbooks
- ✓ Pilot an automated threat response Playbook

MICROSOFT DEFENDER FOR ENDPOINTS
