

## Change of Dimensions solution for Dynamics 365 Business Central

Dedicated „Change of dimensions” solution allows users to change specific reporting data on posted documents. Changes can be made from the general ledger and sub ledgers. The change in dimension values for posted documents is fully controlled by dedicated users with permission to make the change. All changes are recorded in a separate table, in which the user can use the standard functions such as: sort data, filter data, copy data to Excel.

The dimension change tool allows you to:

- enter, edit and delete the dimension code,
- enter, edit and delete the dimension value code,
- indicate the reason for correction of the posted document,
- generate a change log,
- create permissions for dedicated users.

Greatest advantage of „change of dimensions” solution:  
Change the dimension without having to post the credit memo!
