

Automate and streamline complex, knowledge-intensive, and time-consuming repetitive tasks to improve efficiency, productivity, and cost-effectiveness—enabling any team member to complete them quickly and accurately.

*Join the rapidly growing **\$20 billion** Business & Enterprise AI-as-a-Service (**AlaaS**) market, expanding at **35% CAGR**. Tired of development projects, complex chatboxes, LLMs changing interfaces and unpredictable results?*

Example Problem

Law firms frequently receive new cases—for example, evictions, personal injury claims, or divorces—that require reviewing dozens of court dockets and other documents.

Traditionally, highly **trained (and costly) professionals** must read, interpret, and summarize this information to: estimate potential case costs and value; assess the likelihood of success; identify missing documentation; determine applicable laws and precedents and finally recommend courses of action before responding to the client.

*Manual preparation, **even when supported by standard or specialized chatbots**, often leads to inconsistent quality, incomplete information, AI hallucinations, variable accuracy and limited processing capacity regarding the format, size and number of input documents and outputs desired.*

Our Solution

Simply, **any team member**, can upload the case documents to AthenaAIService, select a predefined Template, and click **Process**—receive a complete report in just 10 minutes.

Our platform supports **every stage of a case—intake to final documentation creation**.

Key Functionalities

- **Ready to use from day one**—no development required
- **Monthly subscription**, no CAPEX or OPEX
- Designed for **non-technical users**
- Shields your company from **AI market volatility and complexity**
- **Integrates** unstructured, dispersed data into workflows
- **Intelligent** Document Processing with **multilingual** support and **pre-built** document ontologies
- **Standardizes** AI-related processes organization-wide

Key Benefits

AthenaAIService replaces time-consuming, repetitive work by highly paid experts with a streamlined process any staff member can use. Benefits include:

- **Faster** turnaround and client responses
- **Lower** operational costs
- **Increased** productivity
- **Competitive** advantage
- Ability to offer **new, premium**, rapid services

Key Markets

- Legal, Law, Arbitration, DAAB, FIDIC, Mediation
- Finance, Credit, and Banking
- Auditing, Advisory, and Consulting
- Asset Management, Investing Funds
- Pharma, Labs, and Healthcare
- Patents and Intellectual Property
- Compliance
- *Many other verticals*

Case Studies

- [Miami Eviction Case Intake \(2024-131919-CC-25\), View Report here](#)
26 dockets from the Court web site processed into a final intake report in 10 minutes.
- [Highway Accident Report \(NTSB HWY23FH016\), View Report here](#)
39 documents from the NTSB web site summarized into a report in 10 minutes.
- [Ecuador Constitutional Court Case Admission \(CCE 1149-19-JP/21\), View Report here](#)
- [International Arbitration Analysis, \(MERCK SHARP & DOHME Vs LA REP DE ECUADOR, CNUDMI PCANO. 2012-10\), View Report here.](#)
- Hospitalization History Summary
Hundreds of hospitalization forms processed—extracting patient, pathology, and prescription data, retrieving up-to-date prescription prices from the Internet, and generating a spreadsheet report in minutes.

About Us

AthenaAIService is owned and operated by [Interwave LLC](#) with over 20 years of expertise in **NASA**-grade systems, AI, OSINT, cybersecurity, SaaS, enterprise platforms, fintech, blockchain, and tokenization.

Main Milestones:

At the Voip Group, Inc. (Florida) spin off, envisioned, developed, implemented, and maintained the IVoDS system for **NASA**, enabling seamless communications between Earth stations, the ISS, and the Shuttle for 12 years. In **Germany**, launched the FreeCall Click-to-Phone VoIP service. In **Italy**, provided triple-play telecom services.
