Intraprise
## HEALTH

Secure with Vigilance™

BluePrint Protect™ Risk Management Software

Centrally manage and automate your organization's security program. Utilizing our intuitive interface, users gain a comprehensive, ongoing and accurate view of their organization's program maturity and risks. BluePrint Protect™ allows users to better view, manage, and respond to cyber security needs.

✔ Features Third-Party Assessment Cloud & Exchange

✔ Cyber Risk Index and Enterprise Risk Register

✔ Healthcare-specific software automates workflow, enables collaboration, drives efficiencies

✔ Automates and accelerates key Information Security Office functions

✔ Platform for delivering our industry leading Third Party Risk Management Services

Security Challenges

Third Party/Vendor Risk

The greatest risk to healthcare providers and payers comes from Third Party/ vendor risks

Prevalence of Data

Explosion of the health tech sector has launched hundreds of new companies that access, store, manage and process heath data

Increase in Data Breaches

The number of reported healthcare data breaches has increased significantly from 2009–2018

Diffusion of Responsibility

Responsibility for Third-Party Risk Management has no clear owner and a variety of different tools and manual processes in use

Lack of Expertise/ Resources

Lack of resources and expertise combined with an inability to retain talent are exacerbating the problem

Intraprise Health Security Services

Intraprise Health provides a wide range of security services. The company's expertise in this field spans over 10 years. Completely healthcare focused, Intraprise Health provides advisory services and solutions to meet the healthcare industry's most critical information security needs.
