# Disclaimer

The information shared in this presentation regarding the Centralise Health Information System is for informational purposes only. The content provided reflects the current capabilities, features, and potential benefits of the Centralise Health Information System as of the time of the presentation. While every effort has been made to ensure the accuracy, reliability, and relevance of the information, no guarantees are made regarding the completeness or timeliness of the data presented.

This presentation is not intended to be a comprehensive guide or definitive recommendation regarding the Centralise Health Information System. The views expressed herein are based on the present functionality and scope of the Centralise Health Information System, which may evolve or change over time as the solution undergoes further development or updates. As such, features, capabilities, and pricing may be subject to revision.

The solution discussed is designed to address certain use cases within the Centralise Health Information System, but its application to specific organizations or industries should be assessed independently. The effectiveness of the solution will depend on the specific needs, technological environment, and compliance requirements of each organization.

Introstat and any associated parties make no representations or warranties regarding the future performance or suitability of the Centralise Health Information System for any specific organization or industry. The information provided does not constitute legal, business, or professional advice, and attendees are encouraged to consult with experts in their respective fields before making any decisions based on the content presented.

Neither Introstat nor any associated companies will be liable for any direct, indirect, or consequential damages resulting from the use or reliance on the information presented during this session. The implementation and integration of the Centralise Health Information System should be done in consultation with qualified professionals to ensure compatibility, security, and compliance with applicable regulations.

By attending this presentation, you acknowledge that the information presented is subject to change and that Introstat is not responsible for any errors, omissions, or misinterpretations in the content. It is recommended that organizations conduct a thorough evaluation of any Centralise Health Information System before implementation.

# About US

Introstat is a multi-vendor,value-added solutions provider with branches in Gauteng, Kwazulu-Natal, Western Cape, Limpopo & Mpumalanga offering Managed IT Services.

## Our Vision

Introstat provides tailored managed IT services, earning client trust, becoming the preferred supplier, upholding vendor standards, and creating a workplace our employees take pride in.

Introstat is a proud Level 1 BBBEE contributor. This status enables you to claim 135% of your spend with us towards your BBBEE procurement target.

Our national distribution, support, and skilled sales team ensure fast delivery of top printing and IT solutions anywhere in South Africa.

## Our Great Services

### IT HARDWARE

Computers, printers, and accessories for all needs.

### NETWORK SERVICES

Design, install, and manage secure business networks.

### SECURITY

Protect systems with advanced threat detection and firewalls.

### SERVICE & MAINTENANCE

Reliable onsite and remote IT equipment support.

### PRINT CONSUMABLES

Quality ink, toner, and paper, delivered nationwide.

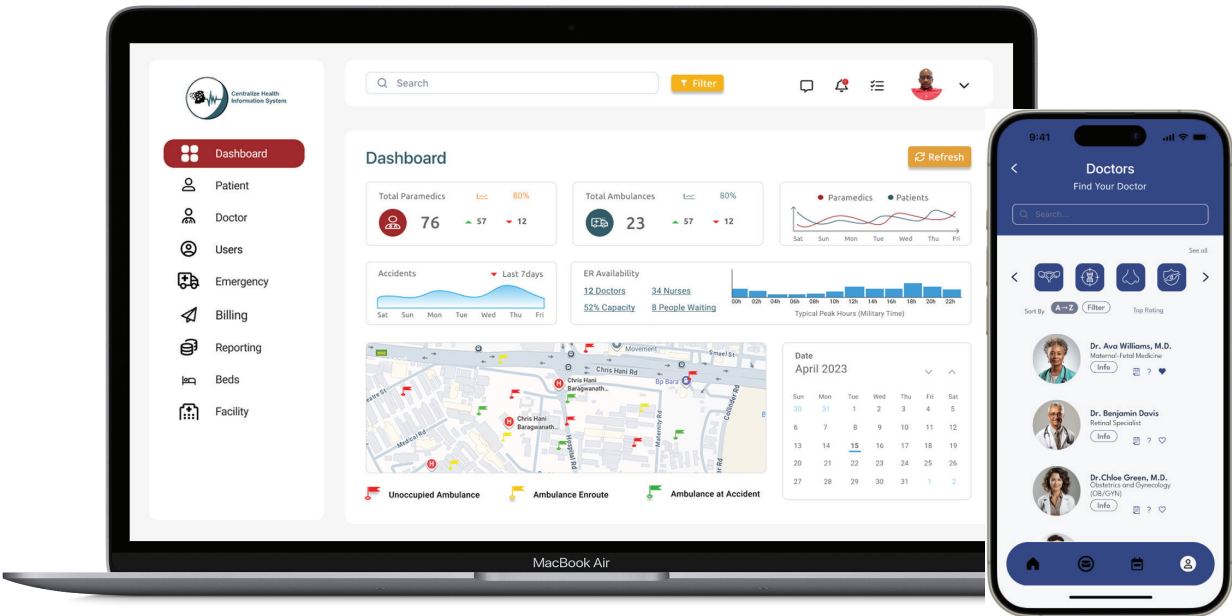

### SOFTWARE

Licensing and support for essential business applications.

# Overview

The Introstat Centralise Health Information System (CHIS) is a secure, cloud-based platform that centralises clinical and operational data, replacing paper-heavy processes with electronic health records, digital triage, referrals, and structured data capture. It improves patient safety, reduces errors, and provides real-time visibility into KPIs, inventory, and financial performance.

Designed for scalability, CHIS can be deployed across hospitals, clinics, and depots with minimal disruption. Its integrated platform pillars including infrastructure, managed print, network security, unified communications, and standards-based interoperability ensure seamless performance and connectivity. Tailored modules for clinic, hospital, and depot management adapt to the unique needs of each healthcare environment, streamlining workflows and optimising resources so providers can focus on delivering exceptional patient care.

The Introstat Centralise health information System delivers secure, paper-light records, improved patient safety, operational visibility, scalable phased rollouts, an integrated platform, and tailored modules for clinics, hospitals, and depots.

**Key Features of the Centralise health information System (CHIS):**

“  
Streamlining health care, one digital record at a time.  
”

“  
Connecting care through secure, intelligent technology.  
”

“  
Real-time insights for better patient outcomes.  
”

**Key Features**

**Secure, Paper-Light Records**

Electronic health records with structured data capture.

**Improved Patient Safety**

Digital triage, referrals, protocols, and complete audit trails.

**Operational Visibility**

Real-time KPIs, inventory tracking, and financial performance monitoring.

**Tailored Modules**

Dedicated solutions for clinic, hospital, and depot environments.

# AI Integration

Our AI-powered workforce tools optimise scheduling by matching staff availability with skills and workload, while providing insights to recognise top performers and address potential risks. Automated reminders and virtual assistants streamline communication, shift management, and routine queries & boosting efficiency.

### Smart Scheduling

Balances staff availability, skills, and workload.

### Risk Stratification

Identifies high-priority patients.

### Virtual Assistants

Handle FAQs, shift swaps, and leave requests.

### Predictive Analytics

Detects risks, reduces readmissions.

## How It Works

Our centralise health information system (CHIS) is seamless and patient-focused. From setup and integration to staff training and go-live, we ensure minimal disruption, enabling faster, safer, and more efficient healthcare delivery.

01

### Setup & Configuration

Customizing the platform to facility's departments, roles & protocols.

### Setup & Configuration

02

### Onboarding & Training

Healthcare staff receive guidance through easy-to-follow materials & live support.

### Onboarding & Training

03

### Integration

Connecting the system to your hospital, clinic, & pharmacy databases.

### Integration

04

### Go Live

Start managing patient records, appointments, & clinical workflows in real-time.

### Go Live

# Benefits

Introstat Centralise health information system (CHIS) delivers comprehensive benefits that streamline operations, enhance patient care, and optimise resources across health-care facilities.

-  **Unified Operations**  
Connect hospitals, clinics, and depots for seamless workflows.
-  **Better Patient Safety**  
Structured data, clinical pathways, and audit trails.
-  **Lower Costs**  
Managed print, device lifecycle management, and right-sized infrastructure.
-  **Fast Issue Resolution**  
Backed by Introstat’s national service and distribution network.

# Compliances

## Purview Information Protection

**Unified Data Classification & Labelling**  
Applies sensitivity labels to control access to sensitive health and financial data.

**Encryption & Rights Management**  
Protects information at rest, in use, and in motion across cloud and on-premise environments.

**Policy Enforcement**  
Sensitivity- and role-based controls ensure compliance with organisational and legal requirements.

**PoPIA & mSCOA Alignment**  
Supports South African data protection and municipal governance models.

**Secure Audit Trails**  
Maintains detailed access logs for accountability.

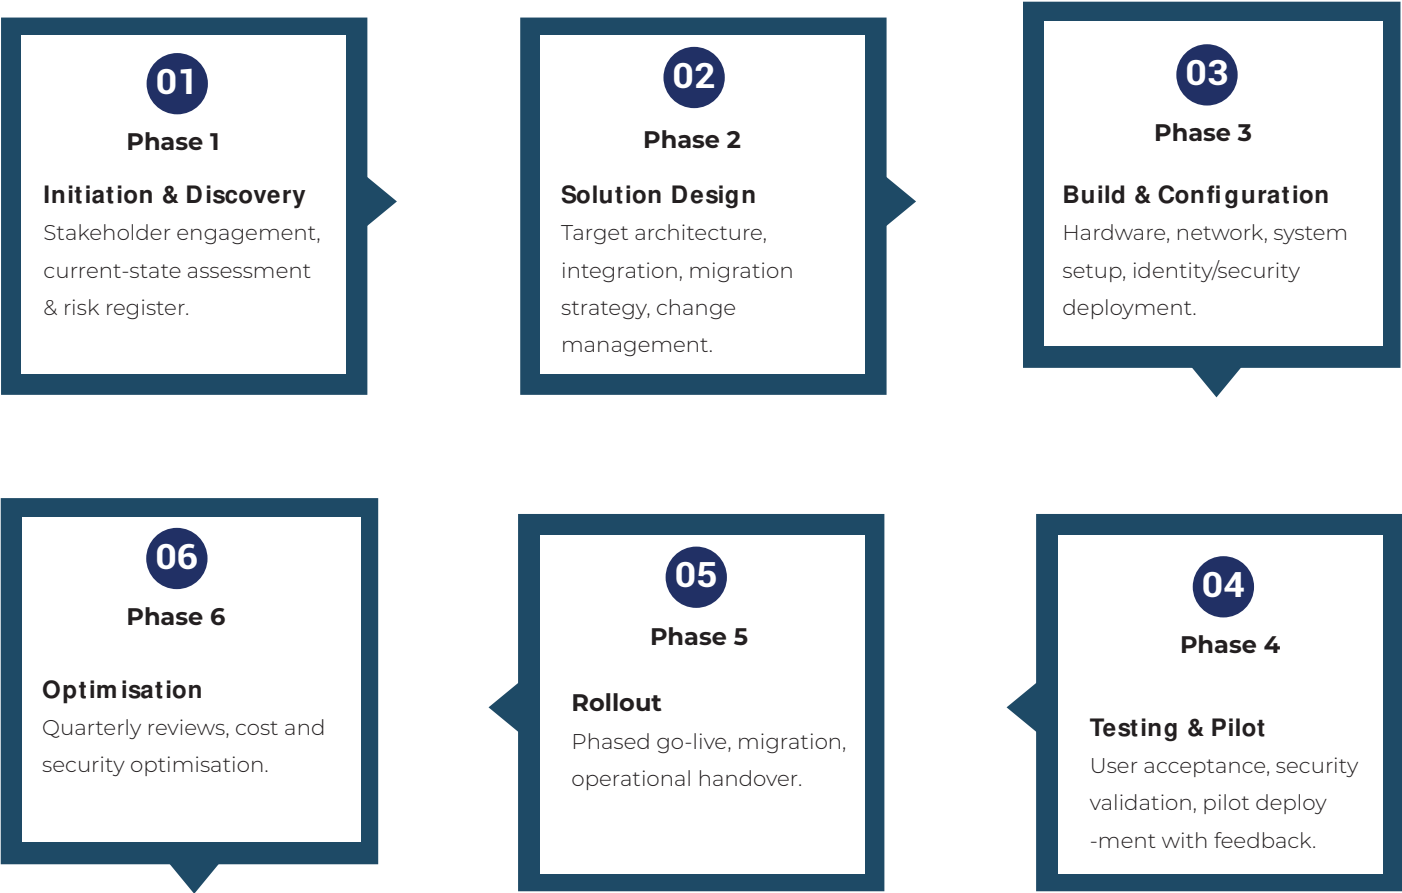

**Role-Based Access**  
Aligns permissions to clinical and financial functions.

**Protection of Records**  
Prevents unauthorised access to patient, financial, and asset data.

# Project Plan

Our implementation process is simple, efficient, and tailored to your business. From setup and integration to training and go-live, we ensure a smooth transition with minimal disruption, so you can start seeing results faster.

# Conclusion

The Introstat Centralise health information system (CHIS) transforms healthcare delivery by integrating secure, paper-light records, real-time operational visibility, and AI-driven insights. It enhances patient safety, optimises clinician workflows, and ensures compliance with South African regulations, all while providing scalable, cost-effective deployments. By unifying hospitals, clinics, and depots under a single platform, Introstat enables smarter decision-making, faster issue resolution, and sustainable improvements in healthcare outcomes.
