# Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

Our goal is to provide assessment, authorization, and continuous monitoring of cloud operations with continuous architectural guidance on organization's transformation initiatives on the Azure Cloud. It helps our clients in hassle-free cloud operations and first time right migration/migration by reducing the Total Cost of Ownership and maximizing Return on Investment

## Cost Saving

Cost saving on infrastructure without compromising infrastructure reliability and run state performance

### Azure Managed services

- Cloud strategy & assessment (Infra, Apps, DevOps, Security)
- Infrastructure as code (iac) terraform, Azure ARM & blueprints
- Devops automation with azure devops
- Containerization & orchestration kubernetes, azure kubernetes
- Hybrid, multi-cloud management using Azure arc

# flexible solutions for your business needs

### Azure CloudOps Assessment

During assessment we review your Azure infrasture and provide complete diagnosis report with key areas that covers

- Identify gaps
- Define hybrid or multi-cloud strategy
- Cloud Cost Optimization
- Roadmap for Re-hosting and Re-platforming

Our experts provide state of art solution based on assessment and pring complete approach for your digital infrastructure. We also provide end to end implementatin roadmap and help you implement automation and modernization.

TECHNOLOGY CONSULTING PROVIDES A TOTAL END TO END SOLUTION.

### Azure CloudOps Managed Services

After the assessment, we offer Cloud Managed Services by continuously assisting in planning, tracking, reducing, optimizing and monitoring of your cloud costs as your managed services provider.

We will help build a Cloud Center of Excellence for a measurable return and TCO, while optimizing the costs without compromising on the performance. We help in automating your tools and imbibing cloud cost optimization in achieving a total Cloud Transformation.

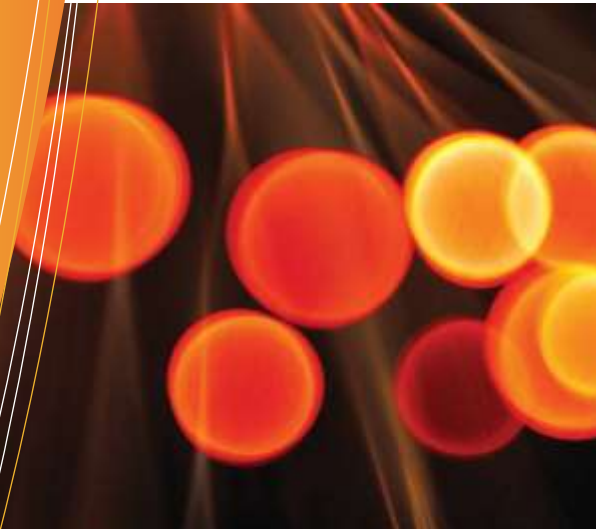

## Effective Performance Analysis and Debugging

Significant reduction in Time spent in debugging issues during releases and automation

## Faster Deployments

Deployment Reliability with Reduction in overall deployment and Reduced infrastructure and application provisioning time from hours to mins.
