

Data Management for Mortgage Servicers

Risk teams can now increase your bottom line with better decisions

Deliver Better Intelligence

Modernize Your Data Platform

- Get access to your data whatever the format in near real time
- Gain insights into your risk models with higher quality of data
- Enable AI/ML for the organization
- Reduce Data management Cost

Over 30% reduction in data management and reporting costs

With Azure Synapse Analytics and Data Lake, business data will be available faster, and save on backups, ETL and database costs.

Additionally Azure enables AI/ML capabilities to your organization and can drive better risk models.

MODERNIZE YOUR DATA PLATFORM

1

Schedule

- Schedule Consultation
- Schedule a call to discuss your goals and roadblocks

2

Scan

- Scan Your Data Estate
- Run a discovery by scanning your data sources. Identify current data stores, dependencies and data flows

3

Plan

- Plan the Migration
- Plan the migration strategy to Azure Synapse Analytics and Azure SQL
- Automate the process, execute and verify data flows
- Train your team

Simple Migration to Azure with Modern Data Management and BI Technologies

- Built on Azure and source system agnostic; works with the data from all your sources
- Pragmatic approach with extensible architecture
- Low TCO and transparent OpEx estimates

Standardized, best-practices Infrastructure in Cloud

- Azure setup with proven models
- Continuous delivery using Azure DevOps, with auditability of all changes
- Multiple environments can be provisioned dynamically to optimized cost

Enable AI/ML capabilities for your organization

- Make AI/ML work for your business in automating routine file processing in seconds with rules
- Drive powerful insights with pre-defined models that adjust your changing data
- Eliminate manual intervention to resolve data issues and errors

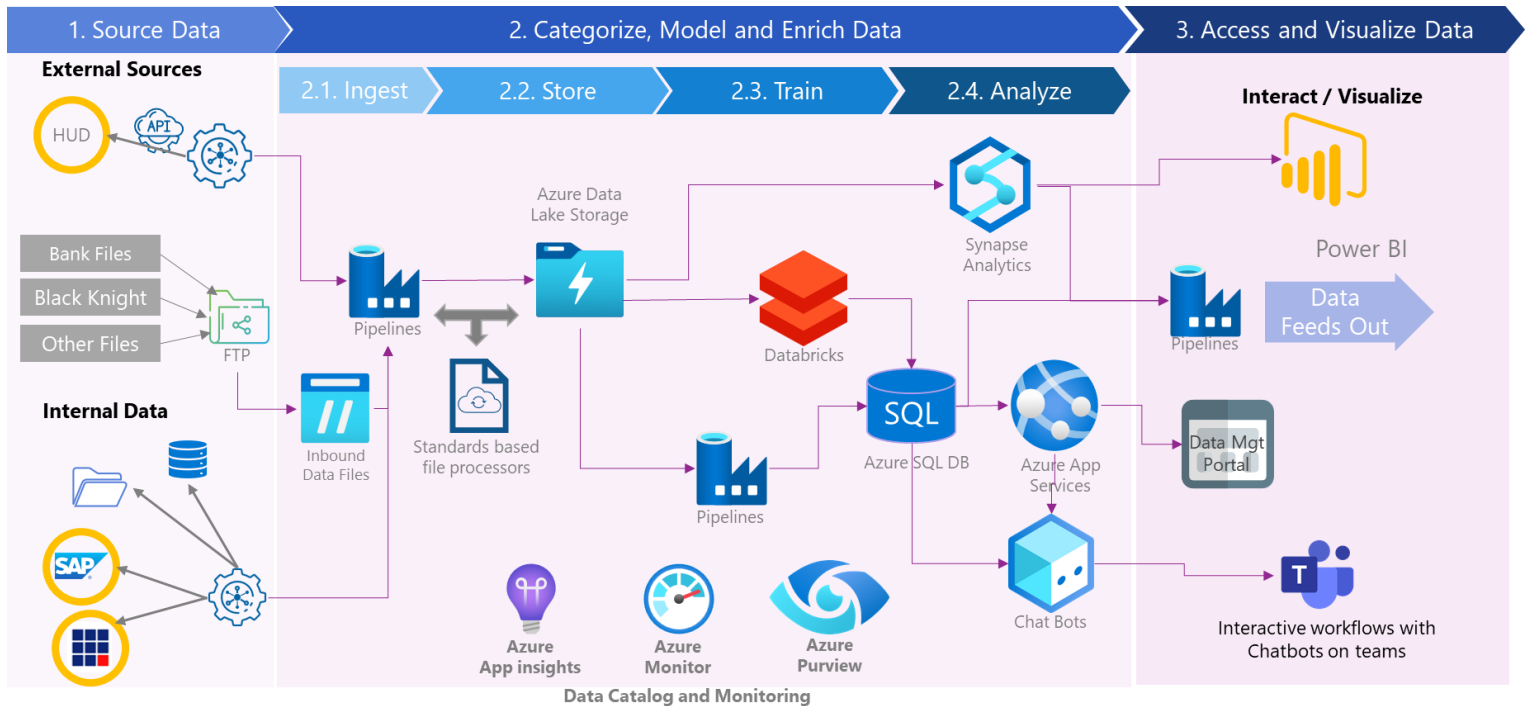

MODERN DATA MANAGEMENT
