OMNI-AI

An integrated, profit-optimizing supply chain solution suite that helps you win in an omni-future.

Omni-AI for Omni-Retail
3 Pillars of Omni-AI

Omni-Network
Create the optimal supply-chain design that finds the right balance - for each region and for each product / category.

Omni-Plan
Inventory and Price Optimization

- Omni-Demand Forecasting
- Omni-Store & DC Replenishment
- Omni-Allocation Optimization
- Omni-Transfer Optimization

- Markdown Optimization
- Assortment Optimization
- Dynamic & Competitive Price Optimization

Omni-Fulfillment
Find the optimal design that finds the right balance - for each region and for each product / category.

It's one thing to dream up new omni-channel supply chain solutions for retail. At Invent Analytics, we also deliver them.

Our unique approach to supply chain integrating your network design, planning and fulfilment helps you to navigate in the new omni-retail era and thrive.

How Omni-AI Works

Omni-Customer

We put your omni-customers at the heart of what we do. What do they want? Where do they want it? And how fast do they want it?

Omni-Forecast

We predict the omni-demand across all channels with our omni-forecast. What happens if some availability or delivery options are not available?

Omni-Lost Sales

We characterize the impact of stockouts and slow-delivery as omni-lost sales. Our system calculates expected lost sales for any decision-making process and minimizes lost sales probability.

Omni-Profit

By connecting the dots in your supply chain, we combine all your KPIs in one metric -that is omni-profit which includes the true cost of stockouts and fulfillment costs as well as Net Promoter Scores.

Benefits of Omni-AI

A fast path to A/B-test proven profit maximization

Generate 100's of basis points of higher profitability through more sales, better availability, faster response to customers, lower fulfillment costs, and improved Net Promoter Scores.

Optimized planning and fulfillment for Omni-Retail

Predict and profit-optimize every aspect of customer demand and match it with inventory at the right place or from the right place.

One unified solution suite to manage your supply chain effectively

Create an efficient supply chain network design, profit-optimize inventory management and optimize order orchestration dynamically in real time.

Delight your customers

Move your supply chain management capabilities to the next level and deliver fast, flawless omni-channel customer journeys for your customers.

A/B Test Proven Client Results

1-4% ↑
Increase
your profits

2-6% ↑
Increase
your sales

10-30% ↓
Lower
your inventory

20-30% ↓
Reduce
fulfillment costs

About Invent Analytics
