Modernize your legacy web app with Invero & Microsoft.

Our **6-8 week Evolve Web App Modernization offer** modernizes your legacy web application through Microsoft Azure's Platform-as-a-Service offerings.

From the "art of the possible" enablement workshop, to architectural design support and a 6-week Proof of Concept, this white-glove solution will fast-track your web application modernization with Invero and Microsoft along side you at every step of the way.

The Evolve Journey

Accelerating Your Digital Evolution.

The Invero Evolve Web Application Modernization solution provides our clients a foundational framework for repeatable best-practice web application modernization.

The first 2 weeks are focused on requirements, enablement and assessment, which inform the 6-week Proof of Concept phase

App Modernization Discovery Workshop
Invero will run an enablement workshop that includes whiteboard design and requirements gathering

Application Modernization Assessment
Microsoft-performed assessment to identify and prioritize the application of choice for cloud modernization

Architecture and Design
Invero will define a desired state architecture based on the application requirements determined in the workshop

Azure DevOps Implementation
If you don't currently have Azure DevOps, Invero will implement an ADO environment for CI/CD pipelines

Proof of Concept
Invero will work alongside your developers to provide guidance & best practices to implement the desired state
