

Social Alert

All companies must have a security plan to protect their staff from potentially dangerous situations. From the parking lot to the lobby, in a case of danger, the team can ask for help from their mobile application, Social Alert.

Challenges

- Little or no possibility of asking for help in a dangerous situation
- No possibility of programming a timer to send the request for help to the security personnel
- Lack of security

Ideal Solution

- Send alert from mobile devices in a dangerous situation. Program a timer to send a warning
- See the exact location of the incident in the Monitoring Portal and dispatch the nearest security personnel
- Use the dashboard section to see statistics of all the events, places, solving time and more

Desired Results

- Increase security
- Manage security incidents efficiently in a timely matter
- Report of security incidents

An emergency alert system for Smartphone

Mobility

- Access to information from any device or place
- Real time interaction
- 24/7 availability

Optimization

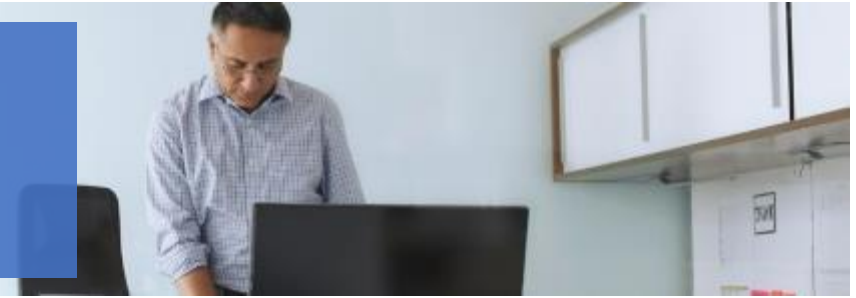

- Customized Social Alert
- Push notifications to users not actively using the app
- Geo-fences creation to determine how to respond to incidents
- Progress tracking

Management

- Allows the administration to identify the security personnel location
- Classification of incidents by type
- Upload documents to support the resolution
- User registration

Alert the security personnel in case of emergency with the touch of a button showing them the location of the incident to take an action

INVID Social Alert

Social Alert with Microsoft Azure , you can alert the security personnel with the touch of a button. Location coordinates are sent to the Social Alert monitoring portal using the user's smartphone data connection to assigns the incident to the nearest personnel.

Product Alignment

Microsoft Azure

Azure is a complete set of cloud services that developers and IT professionals use to create, deploy and manage applications through a global network of data centers. The integrated tools, DevOps and a market help you efficiently develop anything from simple mobile applications to scale solutions.

Success Story

"We wanted to have our own version of Social Alert in the UPR Humacao Campus. We wanted to have the security topic covered so we can focus on other matters. INVID made that possible within weeks."

Dr. Efraín Vázquez-Vera, UPR Humacao

Win Results

- Improved safety in the campus
- Faster response rates when students report an incident
- Mass notification services for all the students and faculty members
- Automatic reports and statistics of incidents inside the campus
