INVISO

Azure Governance, Security, & Cost Management Engagement

73% of organizations say optimizing existing use of their cloud environment is their top priority*

When planning a solution in the cloud, there is always the challenge of balancing cost against performance. It can feel like a guessing game—will your selected options stay within budget or will you have a surprise on your next bill?

Remove the guesswork and gain control of Azure costs with an Azure Cost Management Engagement.

Many organizations today are facing difficult decisions about how to meet their funding needs for critical IT projects. Azure has several tools available to help you get a better understanding of cloud spend along with best practices that help save money.

Inviso can help you identify opportunities for immediate cost optimization and take advantage of longer-term benefits. Through a series of workshops, Inviso will take you through guided learning on how to optimize Azure spend on existing resources and control costs into the future. Hands-on, guided learning in workshops covers these key topics:

- Discovery and well-architected framework review
- Billing Management: ACM + Billing and Azure Advisor
- Analysis and Insights: Azure Monitor + Workbooks
- CAF: Governance beyond cost management

Engagements include:

- Azure Cost Management workshops
- Best practice & optimization recommendations
- Executive Summary outlining business objectives and actionable recommendations to mitigate risks, optimize costs, and implement an ongoing Azure Cost Management program
- Cost Optimization Analysis and Insights Report

Based on a framework you can count on

Our Azure Cost Management Engagement and ongoing program offerings are aligned to Microsoft's Cloud Adoption Framework's Cost Management discipline.
