Maximize your endpoints

Windows in the Cloud Assessment

Do you need to enable an elastic workforce, temporary workers, part-time or shift workers, or people working across company-owned and personal devices like interns, contractors, or software developers? Windows in the Cloud can help.

And we can show you how!

Enable users to be productive and secure from anywhere, powered by AI and on any device, without compromising IT security.

Discover the business value of Windows 365 and Azure Virtual Desktop (AVD) for your organization. Our assessment will guide you in building a compelling business case for a Windows in the Cloud solution that boosts productivity and optimizes costs with powerful, flexible, and secure Cloud PCs and applications. You'll learn how to maximize existing IT investments and enable AI-powered productivity anywhere.

Assessment highlights

Build a detailed business case for adopting a Windows in the Cloud solution based on Windows 365 and Azure Virtual Desktop.

Align user personas with Windows 365 and Azure Virtual Desktop product offerings.

Prepare a cost-benefit analysis, identify and assess possible risks.

Define a roadmap and potential next steps for solution adoption.

Why Inviso?

Our highly experienced team of professionals have helped a wide range of organizations build a business case for Windows in the Cloud. Our goal is to help you enhance productivity and optimize costs, focusing on powerful, flexible, and secure Cloud PCs and applications.
