CONNECTED WORKER JUMPSTART IMPLEMENTATION

Invoke-led Microsoft funding may be available upon request

Value Proposition

Understand how to empower a Connected Worker (Frontline employees) to stay connected, productive, trained, and upskilled through common productivity scenarios while maintaining security & control. Learn how Microsoft 365 is the hub for teamwork that connects workers, bringing everything together in a shared workspace so they can chat, meet, manage shifts, share tasks, and more.

Customer Benefits

- Re-think productivity
- Digitize manual processes & workflows
- Enable simple tools for Connected Worker productivity
- Train & upskill employees
- Strengthen culture, community & inclusivity
- Protect your organization's Connected Worker

Invoke Scope of Delivery

- Assess the readiness of your Microsoft 365 as a Platform
- Envision what is possible and plan for Connected Workers
- Develop and implement governance & controls
- Enable a proof-of-concept app(s) in tenant
- Implement tools to automate management & reporting
- Provide business end-user interactive training sessions
